

## Ring Size Guide

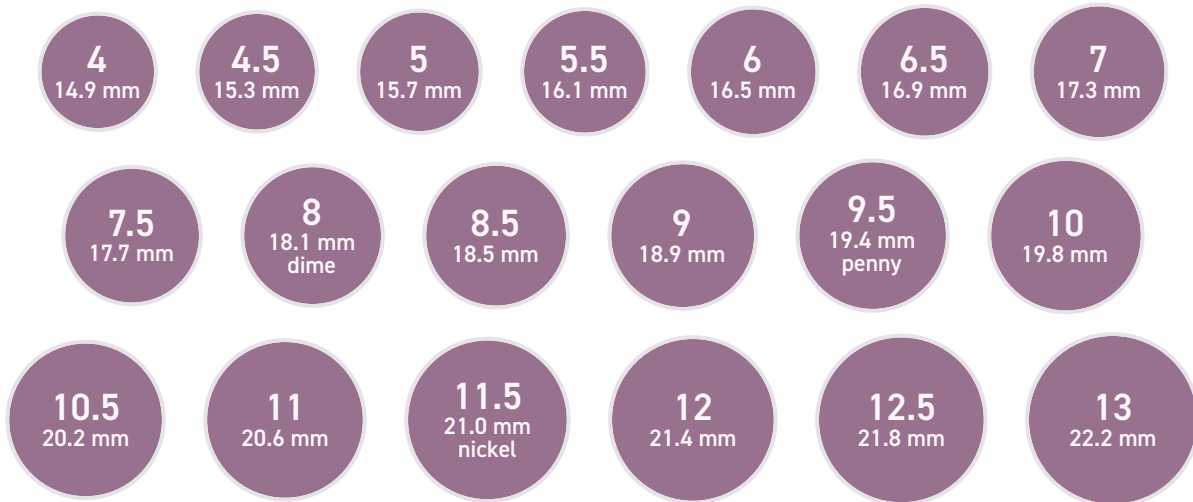

Before measuring your ring size, let's make sure that this page is printed with the correct dimensions. Make sure this guide is printed on US Letter size paper (8.5 x 11") and scaled to 100%. To check the accuracy of your printout, position a credit card under the line below or placing the correct coin in one of the labeled ring sizes. If the card and/or coin lines up, you're all set!

### Option 1: Measure By Matching Your Ring

To find your Crowned ring size, use an existing ring that fits you the way you like. Match the inside of that ring with one of the circles below. You will know that the ring has been placed on the correct size when you can only see the white circle inside your ring.

*Do you fall between two different sizes? We recommend sizing up!*

### Option 2: Measure with the Crowned Ruler

After you cut out the ruler, carefully cut the line to create a slit. Wrap the ruler around your finger at the base and pull the pointed end through the slit. To make sure the ring will fit comfortably, we recommend also measuring your knuckle — your ring *does* have to go around that, after all.
