

Deliver quality patient care with Quilla™

Enhanced bedside solution - Walk up and use, portable, non-backlit digital device. Quilla's innovative solution enables healthcare providers to easily capture updates and information to better engage with patients and care teams.

Improved Consultations - Quilla delivers an interactive experience to communicate with patients in a new way. Care providers can easily show and interact with detailed diagrams, charts, and x-rays for improved patient engagement and understanding.

There is a Better Way

Increase operational efficiency with Quilla™
A portable, digital writing solution for real-time communication.

An superior experience for patient and care team engagement

Simple, walk up and use technology

It's not complicated - there's no setup. Writing that feels like paper and pen and captures information immediately. Intuitive touch features allow you to interact with information - erase, resize, copy, move. Always on, ready to use, and automatically saves as you go. **Improve efficiency!**

Real-time updates & access to data

Care teams and administrators can securely access and update information on any device, anywhere. At patient bedside, nurse's stations, doctor's office, or at the clinic, information can easily be accessed to edit, review and share.

Reduce errors and streamline processes!

Paperless communication

Efficiently capture, update, and exchange information using Quilla's digital ePaper technology which enables easier and faster communication between care providers.

Better communication and collaboration!

A powerful ecosystem that is secure, seamless, and scalable

Connect and collaborate

Quilla's robust ecosystem enables individuals and teams to engage and interact with information in real-time, from anywhere. It is not necessary to have everyone in the same room in order to update information & schedules, train staff, collaborate on a case, or share a patient's status.

Improve productivity!

Patient-centric design

Our innovative, energy efficient technology provides a continuous, non-backlit display that fades into the background. No bright light disrupting the patient's sleep. Doctors, nurses, and administrators can update patient information without disrupting the patient environment.

Non-disruptive technology!

Secure data management

Care providers can capture and store information in a secure cloud-based collaboration platform. Quickly and easily make updates and capture changes in real-time. **Secure data!**

Battery

42" large and still runs for 16 continuous hours on battery.

Secure Content

Auto saves content in centrally managed library with secure encryption.

Mobile apps

Immediate personal access to your library. See and contribute content in real-time.
