This declaration is ongoing and remains in force until revoked in writing

Supplier Name: Winton Stock Feed limited

Address: 139 Florence Road, WINTON, NZ.

Phone +64 (0)3 236 6089

Molasses Description:

Molasses is a thick dark brown liquid which is the by-product of the sugar refining industry. With high sugar and low protein content, molasses has excellent palatability for all classes of livestock.

Feed grade molasses is typically 74.5 % DM has been standardised to 79.5° Brix.

Declaration

Winton Stock Feed sources molasses from sugar mills in several countries, as the importer we adhere to bio-security standards as prescribed by the Ministry of Primary Industries.

To the best of our knowledge the sugar cane does not come from land upon which human effluent or municipal waste had been applied.

Genetically Modified Organisms

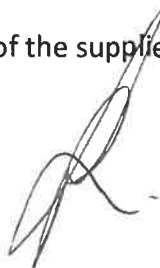

To the best of our knowledge Molasses sourced for Winton Stock Feed is GMO free.

Molasses is free of protein derived from ruminants, complies with Maximum Residue levels laid out in Codex.

Molasses is fit for its intended purpose, as a highly palatable feed ingredient.

It is suitable for feeding to lactating dairy animals.
