

RAKU WALL LIGHT | PRODUCT SPECIFICATIONS

mayclay | ONE OF ONE

BEHIND THE LIGHTING

Every unique ceramic piece is handcrafted with intention and love. Individually made to order in Hannah's home ceramic studio, this project was a collaborative effort between Hannah, MayClay, and husband Greg, a commercial electrician and owner of Grid Electrical Contractors. This means the highest standards have been maintained throughout the process of designing, custom building and testing these hand-crafted wall lights. This unique and rustic approach to lighting design translates into a timeless architectural piece celebrating its subtle raw materials.
