

# Bar End Sliders - will they work on my bike?

**General Fitment:** The main three models below are designed to work in Woodcraft bars. Our handlebars have a 5/8" inside diameter that these sliders are designed to engage. The patented perpendicular mounted slider puck allows for easy replacement in the event of a tip over.

## Fitments for Aftermarket Handlebars with 5/8" ID (Woodcraft and others)

[16-0299](#) RACE BAR END SLIDER (SINGLE)  
[16-0299B](#) RACE BAR END SLIDER (PAIR)

These Sliders offer exceptional protection without adding weight (2oz).

[16-5299](#) WEIGHTED BAR END SLIDER (SINGLE)  
[16-5299B](#) WEIGHTED BAR END SLIDER (PAIR)

These Bar End Sliders have a (4.5) oz billet weight on each side to help alleviate vibration and hand numbness. Very popular for street riders installing clipon risers!

[16-9299](#) BAR END SLIDER W/GUARD MOUNT (SINGLE)  
[16-9299B](#) BAR END SLIDER W/GUARD MOUNT (PAIR)

Our most popular Bar End Sliders offer the ultimate protection for racers, complete with a mounting surface to add Hand Guards to the end of the bar. Street riders will also sometimes use this setup to provide a mounting surface for an aftermarket mirror as well.

## Fitments for Stock Handlebars

Fits Suzuki GSXR (Excluding GSXR1000 2017+), SV and others plus Kawasaki Z125

[16-2299](#) BAR END SLIDER W/ GUARD MOUNT- (SINGLE)  
[16-2299B](#) BAR END SLIDER W/ GUARD MOUNT- (PAIR)

Our first model specific bar ends with hand guard mounts that fit OEM bars. More models to follow later this season.
