

LONG MADE CO

BRASS CYLINDER DOUBLE DROP SPOT

DESCRIPTION

Designed and handmade to order in our Texas studio. Features heavy gauge solid brass construction. Shade heads adjust to true vertical and horizontal positions and turn 330 degrees on axis. Excellent directional ceiling downlight for flat or vaulted ceilings.

FINISH OPTIONS

Available in natural brass, warm oxidized brass, and black oxidized brass. Finish samples available for purchase on website. Made with live, unlacquered brass that is waxed for an even finish that will patina with time.

ADDITIONAL OPTIONS

Hang Straight: Additional swivel at backplate end for use on vaulted ceilings (shown below). This option allows for the drop rods to hang vertically on a slanted ceiling. Each drop rod will get its own hang straight. Adds 1 7/8" to tip-to-tip length.

Drop Rod Lengths: 2" and 4" shown. Custom lengths available.

ELECTRICAL

120-240 Volts
Easy Installation - Includes universal hardwire bracket for 3-4" junction boxes.
Made with UL Listed stamped socket and wire assemblies. Documentation available upon request.
Ceiling or wall application.
Dry indoor locations only.

LAMPING

Bulb not included.
Made with GU10 socket.
Accepts MR16-GU10 LED bulbs, 11 watt max.
Recommended color temperature: 2700 Kelvin.
Light angle spread options: 10-80 degrees; We recommend 30-60 degrees for most spaces.
Email us for sight-specific bulb recommendations.

DIMMING

All of our fixtures are fully dimmable. We recommend a quality dimmable LED bulb (Soraa, Emery Allen) and wall dimmer. Consider Forbes & Lomax wall dimmers, which are available in similar finishes.

WEIGHT

Approx. 3 lbs
