Parts needed for assembly using method #502

- Standard AG10 core (with fastening tabs)
- Countersunk Screw (supplied by contractor)

Disclaimer:
This step by step layout is one of the many ways someone can install their custom grille using method #502
Step 1:
Attach core into the opening (wall/ceiling/floor) using countersunk screws.
Step 2:
Core attached to the opening (wall/ceiling/floor).

Installation complete.
