Parts needed for assembly using method #512

- Standard j-frame (for aluminium)
- Typical dry wall screw (supplied by contractor)
- Standard AG10 core

Disclaimer:
This step by step layout is one of the many ways someone can install their custom grille using method #512
Step 1:
Place welded j-frame & AG10 core into the opening. Attach j-frame to wall / ceiling using drywall screws (supplied by contractor). Screw through the provided holes in the flange as necessary.
Step 2: J-frame attached to wall / ceiling using drywall screws (supplied by contractor).
Step 3: Spackle, sand and finish painting.
Installation complete.
