Parts needed for assembly using method #516

- Standard a-frame
- Standard AG10 core
- Screw (provided)

Disclaimer:
This step by step layout is one of the many ways someone can install their custom grille using method #516.
Step 1:
Place welded a-frame & AG10 core into the opening.
Attach a-frame to the opening using Screws(provided).
Screw through the provided holes in the a-frame as necessary.
Step 2: Welded a-frame & AG10 core attached to the opening using Screws (provided).

Installation complete.
