Parts needed for assembly using method #604

- 208 Lattice perforated grille
- Angle frame
- Drywall screw (not provided)
- Countersunk screw (provided)
- Screwdriver (not provided)

Disclaimer:
This step by step layout is one of the many ways someone can install their custom grille using method #604
STEP 1:
Remove the 208 lattice perforated grille from angle frames by removing all the countersunk screws using the screwdriver.
(If installing multiple grilles be sure to keep grilles and frames together for easier installation).
STEP 2:
Attach angle frame into the opening using typical drywall screws.
STEP 3:
Angle frame attached to the opening.
STEP 4:
Reattach 208 lattice perforated grille on the angle frame using countersunk screws and screwdriver.
STEP 5:
Installation complete.
