

Mounting of the lowest Percolator
Align the lowest Percolator to the text as shown

Cybe one allows you to create a shisha as high as you want. But take care for physical possibilities by stacking up your Percolators! Fresh Smoke GmbH recommends to not use more than 3 Percolators.

Always fill the Vase and the top Percolator with water up to the water indicator.

Clean the parts properly before and after every smoke session with cleaning supplies and warm water.

Never put any parts in a dishwasher!

Keep the shisha away from heat sources and permanent sun radiation.

Use the Tapping Plate only as an ash tray.

In the event of damage to the product or injury sustained due to improper use, Fresh Smoke GmbH take no responsibility and will not be liable.
