

POWER DRAIN WASH RINSE CYCLE 1 CYCLE 2
ON TEMPERATURE TEMPERATURE

# **START**

- Turn on at wall.
- Ensure the Wash / Drain Filter Basket (1) is in place and shut the door.
- Press the Power switch, the switch will glow red and the machine will fill automatically.

#### **OPERATION**

- Load rack into the machine and shut door.
- Press either Cycle 1 (1min) or Cycle 2 (2min) to start the dishwasher.
- Cycle buttons glow green while machine operates.
- When Cycle lights goes out, the cycle is complete.

NOTE: The machine may be started while the rinse water is being heated – the machine will continue to run the wash cycle until the rinse water is up to temperature.

### SHUT DOWN - EVERY NIGHT

- Open the door, press the Drain switch and leave the door open.
- Allow to drain for approximately 1 minute or until the tank is empty.
- Turn the Drain and then the Power switches off.
- Once the machine has cooled down, clean the wash tank, then remove and rinse Wash / Drain Filter Basket (1)
- Check and clear any waste from inside the drain sump.
- Replace Wash / Drain Filter back into machine.

# **CLEANING - AT LEAST ONCE A WEEK**

Remove, rinse and replace when machine has cooled down:

Wash / Drain Filter Basket 1
Wash / Rinse Arm Thumbscrew 2
Rinse Arms 3
Wash Arms 4

- Unscrew thumbscrew (3) to remove Wash Arms (4) and Rinse (3) Arms.
- Inspect Arm and ensure that all jets are clear.
- Use a small object (e.g. toothpick) where necessary to remove any blockages.
- · Check wash element once cool and clean if necessary.

# SUGGESTED BEST PRACTICE

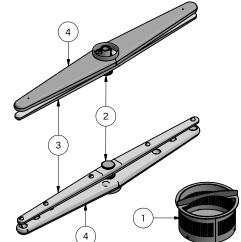

Pre-rinse Scrape and/or rinse glasses in cool water.

Chemical Use a good quality non foaming commercial detergent and drying agent – do not use domestic detergents

which will cause the machine to foam.

Do not use domestic tablets or excessively chlorinated chemicals.

Servicing Commercial dishwashers should be serviced at least every 6 months or 15,000 cycles.
