# TABLE OF CONTENTS

Introduction .................................................................................................................. vii
ACC Economics and Statistics Department Staff ...................................................... vii

1. CHEMISTRY AND THE ECONOMY ........................................................................ 1
   Chemistry in Our Lives .............................................................................................. 2
   Economic Contributions of the Business of Chemistry ............................................ 4

2. WHAT IS THE BUSINESS OF CHEMISTRY? ....................................................... 9
   Cost Structure ........................................................................................................... 11
   Production Indices .................................................................................................. 12
   Price Indices ............................................................................................................ 13
   Shipment Value ....................................................................................................... 14

3. CHEMISTRY 101 ................................................................................................... 15
   Basic Chemicals ...................................................................................................... 15
      Inorganic Chemicals ........................................................................................... 16
      Bulk Petrochemicals and Organic Intermediates ................................................. 16
      Petrochemical Derivatives and Other Industrial Chemicals ............................... 17
   Specialty Chemicals ............................................................................................... 21
      Adhesives and Sealants ....................................................................................... 23
      Catalysts .............................................................................................................. 24
      Coatings .............................................................................................................. 24
      Cosmetic Additives ............................................................................................ 24
      Electronic Chemicals .......................................................................................... 24
      Fine Chemicals ................................................................................................... 24
      Flavors and Fragrances ....................................................................................... 25
      Food Additives ................................................................................................... 25
      Functional Fuel and Lubricant Additives ............................................................ 25
      Institutional and Industrial Cleaners .................................................................. 25
      Oilfield Chemicals ............................................................................................... 25
      Paper Additives ................................................................................................. 26
      Plastics Additives ............................................................................................... 26
      Plastics Compounding ....................................................................................... 26
      Rubber Processing Chemicals ............................................................................ 26
      Water Management Chemicals ......................................................................... 27
      Other Specialties ............................................................................................... 27
   Agricultural Chemicals ............................................................................................ 27
      Fertilizers ............................................................................................................ 27
      Crop Protection .................................................................................................. 27
   Pharmaceuticals ..................................................................................................... 28
   Consumer Products ............................................................................................... 29

4. FINANCIAL PERFORMANCE .................................................................................. 31

5. GLOBAL BUSINESS OF CHEMISTRY ................................................................ 33
   Global CPRI .......................................................................................................... 40
6. U.S. TRADE IN THE BUSINESS OF CHEMISTRY .......................................................... 43
   Exports .................................................................................................................. 43
   Imports ............................................................................................................... 47
   Trade Balance .................................................................................................... 50

7. INVESTMENT IN THE FUTURE: KNOWLEDGE .................................................. 55
   Research and Development Activities ................................................................. 55
      Innovation and Learning .................................................................................. 57
      Service Innovation .......................................................................................... 57

8. INVESTMENT IN THE FUTURE: CAPITAL ............................................................ 59
   Capital Investment ............................................................................................... 60
   Profits and Other Determinants of Investment ..................................................... 61
      Capacity Utilization ......................................................................................... 61
   Motivation for Capital Investment ...................................................................... 62
   Foreign Direct Investment .................................................................................. 63
   Maintenance and Repair Spending .................................................................... 63
   Information Technology ...................................................................................... 64

9. EMPLOYMENT ....................................................................................................... 65
   Total Employment Impact of the Business of Chemistry ...................................... 65
   Knowledge Workers .......................................................................................... 66
   Wages, Benefits and Other Labor Indicators ......................................................... 67

10. ENVIRONMENT, HEALTH, SAFETY AND SECURITY ........................................... 69
    Environment ....................................................................................................... 69
    Health ............................................................................................................... 69
    Safety ............................................................................................................... 69
    Sustainability ................................................................................................... 69
    Environmental Performance ............................................................................. 70
    Environmental, Health and Safety Spending ....................................................... 70
    Worker Health and Safety ................................................................................ 74
    Spending on Security ......................................................................................... 75
    ACC’s Commitment to EHS&S ....................................................................... 76

11. ENERGY .................................................................................................................. 79
    Fuel and Power .................................................................................................. 79
    Feedstocks ......................................................................................................... 79
    Natural Gas & Petroleum Products ................................................................... 81
    Energy Consumption ......................................................................................... 82
    Energy Costs ..................................................................................................... 84
    Chemical Industry Energy Efficiency ................................................................. 84
    Energy Efficiency from the Products of Chemistry .......................................... 85
    Greenhouse Gas Emissions ................................................................................ 86

12. DISTRIBUTION ....................................................................................................... 89
    Transportation by Mode ..................................................................................... 90
       Truck .............................................................................................................. 90
       Rail ................................................................................................................. 90
       Waterborne .................................................................................................. 90
       Other Modes ................................................................................................. 91
Transportation and Logistics Costs......................................................................................................................... 91
Wholesale Trade in Chemicals....................................................................................................................................... 91

13. THE BUSINESS OF CHEMISTRY IN THE STATES AND REGIONS................................................................. 93
   Employment Impact of the Business of Chemistry .................................................................................................... 95
   U.S. Chemical Production Regional Index.................................................................................................................. 98

Appendix A: Chemical Chains ....................................................................................................................................... 99
   A.1 - Chlor-Alkali .......................................................................................................................................................... 99
   A.2 - Methanol ............................................................................................................................................................ 100
   A.3 - Ammonia ............................................................................................................................................................ 101
   A.4 - Ethylene ............................................................................................................................................................. 102
   A.5 - Propylene .......................................................................................................................................................... 103
   A.6 - C4 Hydrocarbons .............................................................................................................................................. 104
   A.7 - Benzene ............................................................................................................................................................ 105
   A.8 - Toluene ............................................................................................................................................................. 106
   A.9 - Xylene ............................................................................................................................................................... 107
LIST OF TABLES

Table 1.1 - U.S. Business of Chemistry Industry Snapshot, 2017 5
Table 1.2 - Industries Dependent upon the U.S. Business of Chemistry, 2016 6
Table 2.1 - Business of Chemistry Summary, 2008-2017 9
Table 2.2 - Characteristics of the Business of Chemistry 10
Table 2.3 - Business of Chemistry Industrial Production Indices (2012=100) 12
Table 2.4 - Business of Chemistry Producer Price Indices (2012=100) 13
Table 2.5 - Business of Chemistry Shipments by Segment ($billion), 2017 14
Table 3.1 - Basic Chemicals Shipments ($million) 16
Table 3.2 - Chemicals and Plastic Resins Production (thousands of metric tons) 18
Table 3.3 - Plastic Resins Summary, 2008-2017 21
Table 3.4 - Specialty Chemical Market Volume Indices (2012=100) 22
Table 3.5 - Specialty Chemicals Shipments ($million) 26
Table 4.1 - Measures of Profitability, Cash Flow and Other Measures 31
Table 4.2 - Solvency, Liquidity, Debt Management & Asset Management Measures 32
Table 5.1 - Global Chemical Shipments by Country/Region ($billion) 34
Table 5.2 - Global Chemical Exports by Country/Region ($billion) 35
Table 5.3 - Global Chemical Imports by Country/Region ($billion) 36
Table 5.4 - Global Chemical Trade Balance by Country/Region ($billion) 37
Table 5.5 - Global Chemical Apparent Consumption/Domestic Sales by Country/Region ($billion) 38
Table 5.6 - Global Chemical Shipments by Segment ($billion) 39
Table 5.7 - Chemical Output by Segment (indices where 2012=100) 40
Table 5.8 - Chemical Output by Nation/Region (Global CPRI) (indices where 2012=100) 41
Table 6.1 - Exports by Segment ($million) 44
Table 6.2 - Chemical Exports by Country/Region ($million) 45
Table 6.3 - Exports by Trade Group ($million) 46
Table 6.4 - Imports by Segment ($million) 47
Table 6.5 - Chemical Imports by Country/Region ($million) 48
Table 6.6 - Imports by Trade Group ($million) 49
