MANUAL CENTER STAND FOR HARLEY TOURING 2009-PRESENT INSTALLATION MANUAL

**WARNING THIS STAND IS DESIGNED FOR HARLEY'S WITH AIR SUSPENSION ONLY AND STOCK SIZE REAR WHEEL AND TIRE.

1). Locate and identify the crossbar on the bottom rear of your Harley

2).locate the J Bracket with the welded nut on it remove the bolt and place over frame on left side lining up the hole from the nut on the J bracket with the hole on the crossbar

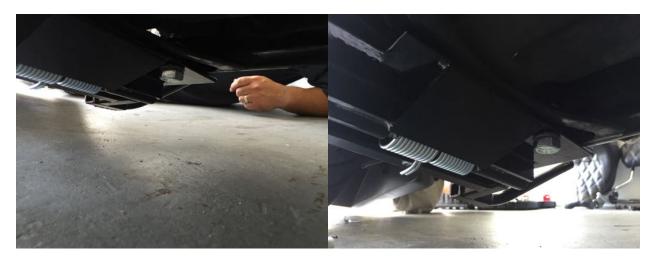

- 3). Now take the center stand and slide the angle bracket on the center stand over the crossbar 4). Push center stand forward and make sure it's flat against crossbar

Now insert the bolt thru the hole in the center stand and screw it into the welded nut on J bracket use a 3/4" socket to tighten up the bolt.

5). Once everything has been tighten down it should look like this. Now your center stand is secured and fully functional.

Make sure and always use center stand on level surfaces (concrete, asphalt, tiles, pavers etc.) Do Not use the center stand in uneven and/or soft surfaces like (grass, sand, etc.)
