What do the regulations require (except for specific exemptions)?

In the US, it is unlawful to:

• Cause a vessel to approach, in any manner, within 300 yards (274.3 meters) of Southern Resident killer whales (SRKW) and 200 yards from transients.

• Position a vessel to be in the path of or behind any killer whale at any point located within 400 yards (365.8 meters) of the whale.

• Travel faster than 7 knots within 1/2 mile of any killer whale or fail to disengage engine within 300 yards.

In Canada (British Columbia):

• Vessels are required to maintain a minimum approach distance of 400 meters from all killer whales in all southern BC coastal waters between Campbell River and just north of Ucluelet; 200 meters from all killer whales in BC waters year-round.

• Avoid boating or fishing in Interim Sanctuary Zones.

Who do the regulations apply to?

All motorized and non-motorized vessels (including kayaks and paddleboards), with exceptions to maintain safe navigation and for certain types of vessels.

Additional information, specific details on exceptions and more can be found on the website: http://bewhalewise.org

TRANS-Boundary LAWS AND GUIDELINES FOR THE U.S. AND CANADA APPLY TO ALL MARINE MAMMALS AND BIRDS

LAWS:

• DO NOT disturb, swim with, move, feed or touch any marine wildlife. If you are concerned about a potentially sick, stranded or entangled animal, contact your local stranding or response network.

• In Canada, keep 100 metres away from all whales, dolphins and porpoises or 200 metres away if they are resting or with a calf and abide by specific approach distances for killer whales.

GUIDELINES:

1. DO NOT APPROACH or get closer than 100 metres/yards to any other marine mammals or birds.
2. BE CAUTIOUS, COURTEOUS and QUIET around areas of known or suspected marine wildlife activity, in the water or at haul-outs and bird colonies. When safe to do so, turn off fish finders and echo sounders.
3. LOOK in all directions before planning your approach or departure from viewing wildlife. Be vigilant for signs of marine mammal presence. Whales may change direction or surface unpredictably.
4. SLOW DOWN. Reduce speed to less than 7 knots when within a half mile or 1000 metres of the nearest marine mammal to reduce your engine’s noise and vessel’s wake.
5. ALWAYS approach and depart from the side, moving parallel to the animal’s direction of travel. If the animal(s) are approaching you, cautiously move out of the way and avoid abrupt course changes. DO NOT approach from the front or from behind.
6. PLACE ENGINE IN NEUTRAL OR SHUTDOWN and allow animals to pass if your vessel is not in compliance with regulations.
7. PAY ATTENTION and move away, slowly and cautiously, at the first sign of disturbance or agitation.
8. STAY on the OFFSHORE side of whales as they are traveling close to shore.
9. ALWAYS avoid going through groups of porpoises or dolphins. Hold course and reduce speed gradually to discourage bow or stern-riding.
10. LIMIT your viewing time to 30 minutes or less. Consider number of vessels present to reduce the cumulative impact of all vessels and give consideration to other viewers.

100 metres/yards = 1 CONTAINER SHIP

Drone/Unmanned Aircraft Vehicle or System (UAV/UAS) Guidance

The noise and close proximity of drones can disturb wildlife. When viewing marine mammals from the air using a drone: (1) Maintain a 1,000-foot minimum horizontal distance and do not fly directly over marine mammals; and (2) avoid vehicle maneuvers around marine mammals (on land or in the water), as these actions may alter animal behavior. Know and follow all local regulations.

Marine Protected Areas, Wildlife Refuges, Ecological Reserves, Parks, and Sanctuaries:

1. CHECK your nautical charts for the location of various protected areas.
2. ABIDE by posted restrictions or contact a local authority for further information. Avoid voluntary No-Go Zone on the westside of San Juan Island. Be aware of critical habitat areas and Canadian Interim Sanctuary Zones (www.tc.gc.ca).

Report a marine mammal harassment, entanglement or stranding:
