MetabolicBiome™ *Plus*

7-Day Healthy Weight Management Program

Delicious | Safe | Convenient | Easy-to-Follow

Biotics Research is proud to announce the **MetabolicBiome™ *Plus*** kit, a healthy weight management program founded on the revolutionary premise that yes, we are what we eat, but we are also what our trillions of gut microbes eat.

By mimicking the effects of a diversified plant-based diet, the **MetabolicBiome™ *Plus*** kit supports a patient's optimal weight using a two-pronged approach:

1. Optimize gut microbiota through polyphenolic stimulation
2. Support healthy blood sugars through macronutrient balance and key nutrients

KEY FEATURES

- 20 grams of protein
- 9 grams of healthy fats
- 9 grams of fiber
- 3 protein choices
- Great-tasting flavors
- Mixes easily
- Sweetened with monk fruit
- Gluten Free

At Biotics Research, we have maintained an open mind regarding weight loss research and also understand that if a dieting trend is extreme or unrealistic, we will most likely see a compensatory reaction in the opposite direction. Therefore, "balance" must be the operative word in any healthy weight management program. With research showing that weight loss programs fail most of the time, with more than 80% of "successful dieters" gaining back all of their weight within about two years[1], we see the need for a seismic paradigm shift in achieving sustainable weight loss.

Combining cutting-edge weight loss research with reasonable lifestyle recommendations, Biotics Research created the **MetabolicBiome™ *Plus*** kit, a revolutionary healthy weight management program that supports blood sugar stability and, also, targets the health of the gut microbiome to optimize metabolism and promote a person's ideal weight.

Blood Sugar Stability

Glucose and insulin homeostasis depend on a wide range of micronutrients often lacking in a typical American diet. The **MetabolicBiome™ *Plus*** kit contains **GlucoResolve™** as a cornerstone to the program. **GlucoResolve™** provides targeted nutritional support for healthy glucose and insulin metabolism to foster healthy weight management. In addition to key vitamins and minerals, **GlucoResolve™** contains the following nutrients critical to glucose and insulin metabolism:

- Pomegranate Seed Extract
- Berberine
- R-Alpha-Lipoic Acid
- Green Tea Extract
- Forskohlii
- Baikal Skullcap
- Taurine
- Carnitine
- Vanadium
- Vitamin E and Selenium
- Chromium
- Biotin

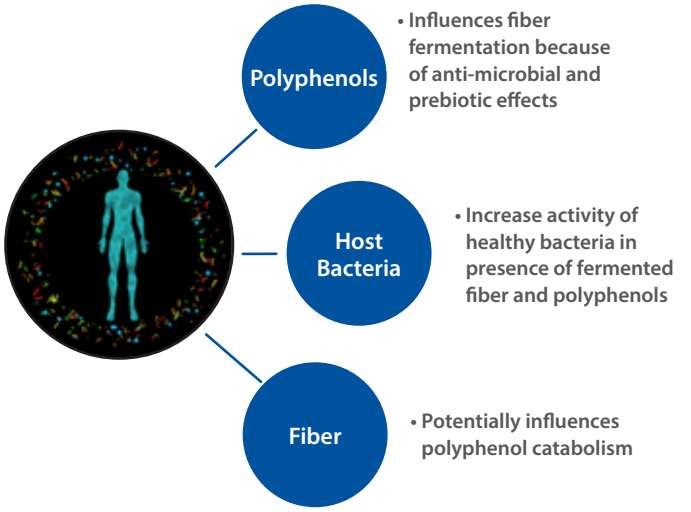
Microbiome Health

Due to the beneficial potential that gut bacteria have on a multitude of molecular mechanisms to foster healthy metabolism, providing nutrients to foster gut flora health is foundational to the **MetabolicBiome™ *Plus*** kit. The **MetabolicBiome™ *Plus*** kit provides high-quality protein, healthy fats, fiber and phytonutrients, all essential for optimal human physiology and health of the gut microbiome.

High polyphenols have been linked to greater weight loss. "When polyphenols are metabolized by the microbiota, glycans are produced. Glycans are foundational nutrition for the gut bacteria. It appears that Bacteriodes have more glycan-degrading enzymes, and are, therefore better able to ferment polyphenols to phenolic compounds, exerting a weight-lowering effect."[2]



Some key ingredients in the **MetabolicBiome™ *Plus*** powder include:

- Non-GM sugar beet fiber
- Apple fiber
- Fenugreek fiber
- Bamboo fiber
- Organic flax seed
- Apple pectin
- Chia seed
- Acai berry
- Blueberry
- Organic broccoli sprout
- Organic kale sprout
- Carrot
- Organic cauliflower sprout
- Avocado oil
- Coconut oil

MetabolicBiome™ *Plus* comes conveniently packaged in 7-day kits and is available in different protein bases **(whey, hydrolyzed collagen and pea proteins)** and flavors (vanilla and chocolate) so patients have a variety of selections.

Each 7-day MetabolicBiome™ *Plus* kit contains:

- 14 packets of **MetabolicBiome™ *Plus***, a meal replacement powder to promote the growth and activity of a healthy microbiome
- 14 supplement packets that include **GlucoResolve™** to support healthy glucose and insulin levels, **Biomega-700™** (Omega-3s) and digestive enzyme support
- Patient Guidebook
