

Electric Tug

Heavy Duty

- Use for logistics handling and traction in hospitals, factories, aviation and other fields to facilitate different traction requirements.
- Man-machine integrated control handle flexible in operation with many functions.
- Maintenance-free battery and permanent magnet traction motor provides greater traction power.
- Stable product performance, compact size, flexible operation, noise free, environmental protection, easy maintenance.
- US imported Curtis computer controller for greater torque, faster speed, higher reliability, better thermal performance and smoother acceleration.

Model	ET15
Load Rating	1500 kg 3,306 lb
Overall Dimensions	1630 mm*760 mm*915 mm 64.1"*29.9"*36"
Speed (full load/unload)	4/5 Kw/h
Max Gradeability (full load/unload)	8/10%
Motor Power	DC24/800 V/w
Battery	2*12/70 V/Ah
Charger	24/15 V/A
