

Self-Dumping Hopper

Ideal for handling: Heavy scrap metal, wood and metal chips, organic waste and recyclable products

The multi-purpose dumpster is safe, durable, reliable, efficient, and easy to operate.

Designed for forklift handling, safe dumping, and to tip for-ward far enough for complete release of contents. Dump by simply releasing a small safety latch before lifting the bigger lever attached to the base at the back.

Ten and seven gauge construction and strategically placed supports will ensure years of use in all types of conditions.

Scientifically designed to have an exact centre of gravity to allow full forward motion and full return to lock mode.

Features

- Available in any size
- Powder coated
- Excellent trash receptacle
- For wet or dry use
- Easy to keep clean
- Well balanced
- Different sizes make outdoor and indoor use possible
- Safety lock prevents accidental dumping
- Safety chain keeps the dump-ster safely on the forklift

Removable Pin System
