

Hand-held welding torches Robust-L

The easy to handle, lightweight and uncomplicated hand-held welding torch for the tarpaulin industry.

Product description

This device is only equipped with one fixed heating stage with additional cold stage and can thus be considered an economic tarpaulin welding device for car upholsterers.

The tarpaulin processor is able to weld his PVC material at a constant heat output and in addition enjoys all the benefits of professional and fatigue-free welding thanks to the device's ergonomic handle and the familiar industrial quality.

As on all FORSTHOFF hand-held welding torches with integrated fan, the commutator carbons on model Robust-L are easy to replace from the outside, without having to open the device.

This device also offers the new feature of carbon brushes with safety lock. When the carbons are used up, the motor stops to avoid damage to the commutator and consequently repair costs.

The device's heat output is adapted to the 20 mm or 40 mm wide slip-on nozzles required by the tarpaulin manufacturer.

The hot-air welding device Robust-L with accessories for welding tarpaulin materials.

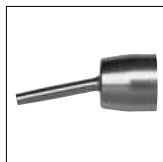

Technical specifications

Model	ROBUST-L
Voltage	230 V 50/60 Hz or 120 V 50/60 Hz
Heat output	depending on slip-on nozzle 900 W 230 V or 1500 W 230 V 1230 V
Temperature	Adjustable maximum output
Weight	200 g with 3 m connection cable
Dimensions	Length 320 mm, handle diameter 52 mm
Electrical safety	II /  (Double insulated)

Areas of applications

- Car upholsterers
- Tarpaulin manufacturers
- Tent manufacturers
- Canvas covers
- Manufacturers of advertising tarpaulins

Accessories

Item No. 4000
Round nozzle, 5 mm

Item No. 4002
Nozzle, 20 mm flat

Item No. 4003
Nozzle, 40 mm flat

Item No. 4011
Insulating tube
Item No. 2000
Heating element
630 W
Item No. 2004
Heating element
900 W
Item No. 2007
Heating element
1500 W

Item No. 6994
Pressure roller
1-armed, 28 mm
bearing mounted

Item No. 7000
Pressure roller two-
armed, 45 mm

Item No. 7001
Pressure roller one-
armed, 45 mm

Item No. 7002
Pressure roller two-
armed, 80 mm

Item No. 7006
Pressure roller one-
armed, 45 mm, 45°
offset (patented)

Item No. 7014
Seam tester

Item No. 7012
Metal case
