- ※ 도료의 특성상 표준도장사양에 규정된 도막의 준수가 중요하며 동일한 하도, 일정한 두께로 도장공정을 관리하십시오.
- ※ 색상은 주문품입니다.
- ※ 내후성도료(세루폰, 루미온)에 본 컬러백의 색상 적용이 가능합니다.

### ◆ 프로폰 도장시 주의사항

- 알루미늄 건축외장재의 미관을 향상시키기 위해 메탈릭 또는 특수한 안료의 사용시 대기오염물, 산성비, 산 및 알칼리 등에 의해 산화될 가능성이 있으므로, 이를 보호하기 위해 투명도장이 필요합니다.
- 모든 불소칼라는 더 나은 내후성 및 내구성을 위하여 투명도장을 할 수 있으며, 도막두께에 따라 약간의 색차가 발생할 수 있습니다.
- FROPON(S) P COLOR 도료는 우수한 물성의 필름을 사용하여 투명도장이 필요하지 않으나, 도장시 규정도막두께의 준수와 균일한 도장이 중요합니다.
- 일부 상도색상은 작업성 및 색상안정성을 위하여 프라임의 칼라를 따로 추천하는 경우가 있으나, 문의 후 사용하시기 바랍니다.
- 프로폰의 성능 발현에 있어서 전처리 상태도 관련이 크므로 전처리 공정관리에 만전을 기해주십시오.

### ◆ PRECAUTION

- Fropon 3 Coating system is a premium quality high performance finishing system with a wide range of new bright accent color, metallic shade.
- This system exhibits outstanding durability with exceptional resistance to staining and chemical attack by acids, alkalis and atmospheric contaminants such as acid rain.
- All Fropon color can be specified with Fropon clear topcoat for even greater durability and protection.

▶ 외부환경에 민감하므로 CLEAR 도장을 추천합니다.
