Cape Soleil

Introducing Cape Soleil Contract Outdoor Furniture

Created with hoteliers in mind, Cape Soleil Outdoor Furniture offers beauty, function and simplicity in a selection of materials, patterns and tones designed to complement any style, from sophisticated elegance to casual and breezy. Using only the strongest components and the trusted and proven Sunbrella™ fabric for cushions, Cape Soleil Outdoor Furniture puts the hotelier in the designer's chair to create unique spaces guaranteed to impress *and* endure.

Hotels, restaurants & resorts look to outdoor furniture to offer the best experience for guests by following the latest trends to keep spaces fresh and to *keep guests coming back again and again.*

The goal is to create fashionable, inviting spaces with the following *Trends* in hospitality furniture.

Go Green and/or Blue

- Creates a calming, inviting, relaxing space (think ocean, beach, pool)
- Color tones of fabrics and finishes contribute to this cool and inviting feeling

Combine Different Materials & Styles

- Cape Soleil includes a variety of styles, finishes and materials
- Designed to stand alone or paired together, Cape Soleil is designed to mix and match for an eclectic designer look that's beautifully cohesive and inviting

Minimize Maintenance with Aluminum & UV Resistant Fabrics

- Comfortable outdoor furniture with minimal maintenance
- Light weight material known for its strength
- Weather and rust resistant equals long-term durability
- UV resistant contract fabrics from Sunbrella™ protect against fading and stand up to rigorous use in commercial environments

Indoors & Outdoors go Together

- Cape Soleil can be just as appealing indoors or out
- Hotel designers are carrying the indoor looks to outdoor spaces as well as bringing the outdoors in!

Outdoor heaters are the perfect addition to virtually any outdoor area starting with front entrance and valet areas to greet guests as they enter your property or await their ride for off-site transportation. Outdoor spaces are no longer just for summer months. Guests have come to love their outdoor living spaces at home and trends show that guests love outdoor areas when they travel just as much if not more. Create memorable guest experiences that impact positive guest reviews and drive loyalty rates by putting the finishing touch on outdoor areas with the perfect glow and warmth of patio heaters ranging from table-top to 7' varieties in a range of finishes and materials including all-weather wicker, stainless steel, and more. Contact us today and let us help you select the right model for your environment.

Regardless of your location, keep guests cool and comfortable in hot, humid or dry conditions with the latest technology in fans, misters and umbrellas to enhance the guest experience that guests will appreciate and remember for years to come.

OUTDOOR ESSENTIALS

Outdoor Fans, Misters & Umbrellas

Cape Soleil 7.5' Market Umbrella and Base

Cape Soleil umbrellas add the finishing touch for outdoor seating areas and shield guests from the bright light and heat of the sun. Umbrella material is made of 100% acrylic fabric using industry-leading Sunbrella fabrics with attention to design detail and engineered with robust performance characteristics that provide resistance to fading and degradation from sunlight and chemical exposure. Fabrics are flexible yet durable and provide industry-leading environmental characteristics that make them easy to care for and long-lasting in nearly any environment. Umbrella frames are made of contract quality aluminum in a variety of powder coated finish options that stand up to contract use and provide the ultimate guest comfort. See page 23 for available Sunbrella fabric and finish options.

Honeywell CO48PM Evaporative Air Cooler

The Honeywell 1062 CFM indoor/outdoor evaporative air cooler offers an energy efficient cooling option when the air is hot with low humidity, such as desert areas like the southwestern United States (recommended humidity level is 60% or less for maximum efficiency). Honeywell evaporative air coolers do not require power hungry components like compressors. The low power consumption (only 150 watts) translates into significant savings on energy bills compared to using air conditioners. Just unpack, add water/ice, plug it in, and use. For outdoor use it is weather resistant, UV protected and has an air-throw up to 9.4 yards. For indoor use, place near an open door or window in an area up to 610 square feet with adequate cross ventilation. For those living in more humid climates, consider portable air conditioning units or window air conditioners for indoor use.

Lasko 7050 Misto Outdoor Misting Fan

Lasko's 7050 Misto Outdoor Misting Fan is ideal for adding comfort to picnics, decks, patios, sports, gardening and even DIY projects. Misto attaches to your garden hose to create a fine-mist breeze that can reduce outdoor temperatures by as much as 25 degrees putting an end to sweating through summer activities. Misto is safe, durable and built to last. Setup is very easy; hook a hose up to the Misto, plug it in and turn it on. To operate, you can pick from three different levels of mist and choose if you want the fan to oscillate. Within seconds of flicking the switch you have a cool mist coming out. The Misto is weather, UV and rust resistant so once you set it up, you can pretty much leave it out. Plus, the misting kit detaches without tools for easy cleaning. Misto is NOT a toy...use caution and always supervise children while using Misto.
