

It is possible to connect two tanks together. Please use the 3P Connection Set 25 mm (Art. No. 9000326).

Instructions

We recommend using the 3P Filter Collector Universal to fill the Norway.

Where the water butt cannot be located within 30 cm of the downpipe, the longer Universal Long Kits are available online (Art. No. 9000123U to U5).

Delivered with Tap

If in any doubt during installation, please consult a professional tradesperson.

1. Setting Up

Site the Norway on a firm, level surface adjacent to a downpipe.

2. Connection to the downpipe

Locate the area to form a hole for connecting the downpipe filter or diverter. Use the hole saw set and take care to select the correct saw size.

Choose the 32 mm hole saw for a 32 mm connection, or the 58 mm hole saw for a 58 mm connection. Refer to the instructions for your selected downpipe filter.

3. Collecting Water

A 3/4" BSP thread is located 30 cm from the base of the tank. This can be used to connect a tap or any other 3/4" BSP fitting.

4. Base Threads & Winter Care Precautions

To minimise the risk of any damage being caused, the Norway must be drained completely and disconnected from the rainwater inlet during freezing weather conditions.

The 3/4" BSP base threads can also be used to connect pumps or other tanks to
