

Seed Tray Rack D2(01)
Assembly Instructions

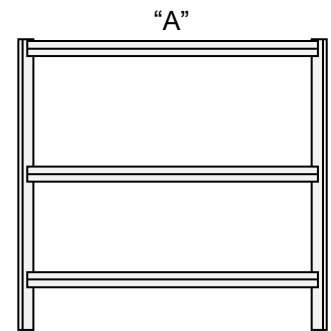

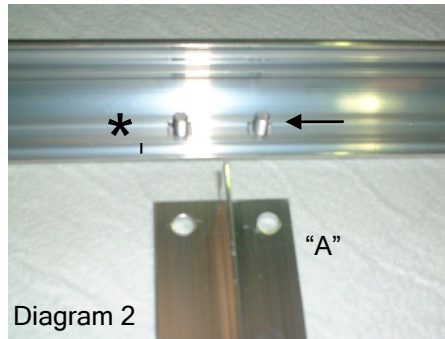

Components

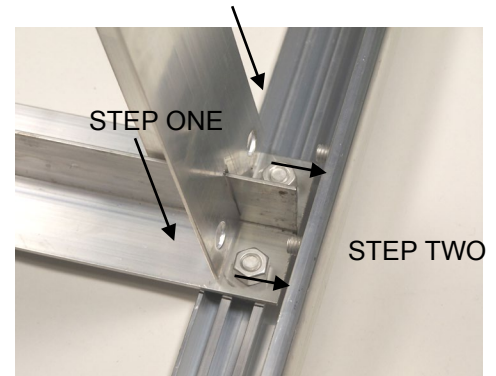

Number of Shelves	2	3	4
Corner Upright	4 @ 61cm	4@91cm	4@122cm
Horizontal "A" 981mm	4	6	8
Horizontal "B" 399mm	4	6	8
Square Nuts & Bolts	32	48	64
Seed Trays	8	12	16

1. Please check the components.
2. Decide at what level you wish to set the shelves. Mark * the inside of each upright with these levels so that you know where to attach the horizontals.

3. Take two uprights and attach the horizontals A (2, 3 or 4 depending on the height of the rack) and slide sufficient bolts down each channel (2 per shelf - dia. 1); line up the horizontals with the marks you have made; slide the bolts to match up with the holes in the horizontals (dia. 2); locate the horizontals over the bolt stems and fasten them with the nuts; square up and tighten. This will give you one side section - repeat to make the other.

4. Join the two side sections with the horizontals B.
Step one, position the slot in bar B over the flat of A.
Step two; slide B onto the bolt stems (dia. 3).
5. Check that the trays are a snug fit before finally tightening up.

Please Note.

If your rack has been supplied with watertight gravel trays an angle support has been included for each tray. This sits across the frame before the tray is positioned.
