

**SUPER-ALLIPLUGS &  
ALLIPLUG CORNER ADAPTORS** P2 (01)  
**Instructions**

**SUPER-ALLIPLUGS**

Super-alliplugins are used to fix lining materials to the inside of an aluminium greenhouse.

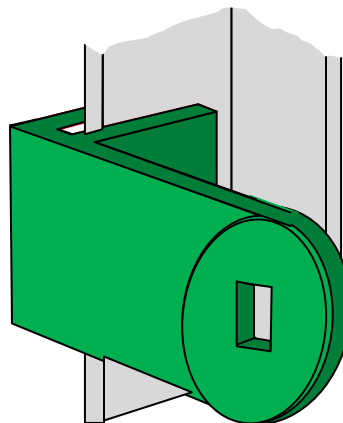

**METHOD**

1. Slip the washer onto the stem of the alliplug.
2. Push through the lining material into the glazing bar channel.
3. Twist clockwise until it is firmly held in position.

**ALLIPLUG CORNER ADAPTORS**

Alliplug corner adaptors are used to fix a lining into the corner of a greenhouse. When there is no means of fixing in the corners or round the door frames of your greenhouse, this adaptor will solve the problem.

It simply clips onto the corner bar and can then be fitted with a Super Alliplug.
