

# Gardeners Cloche P8 (09)

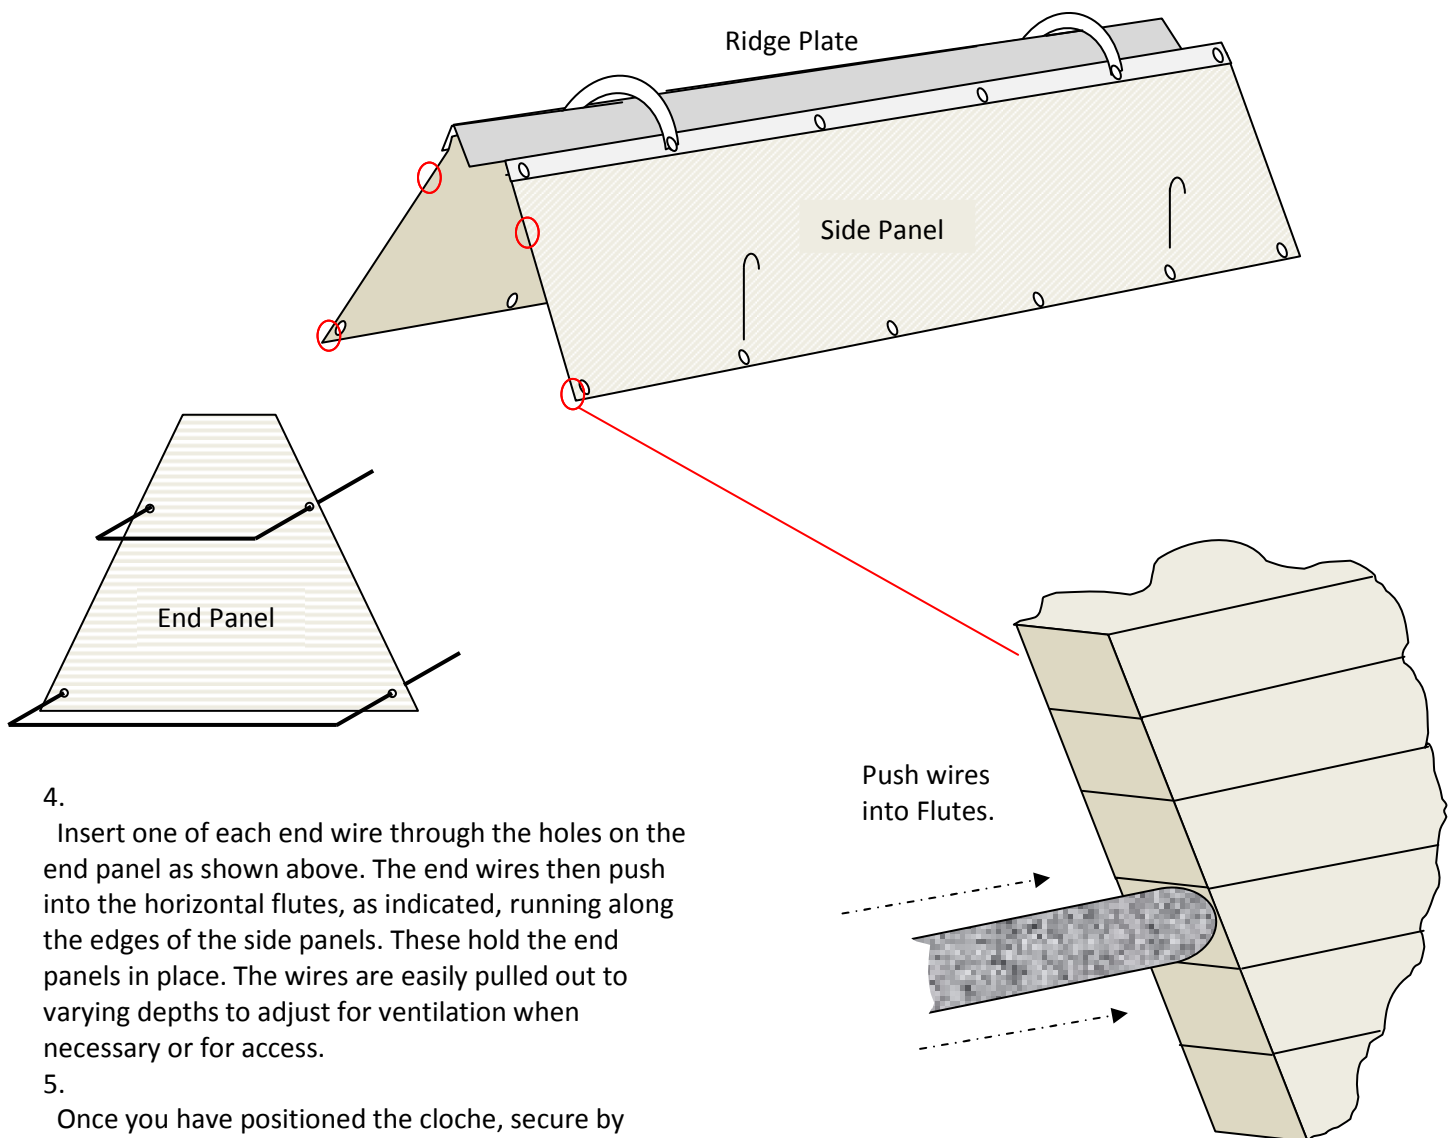

## Assembly instructions

### Components

Ridge Plate (aluminium sheet)	x 1
Side Panels (polypropylene)	x 2
End Panels (polypropylene)	x 2
Lower End Wire	x 2
Upper End Wire	x 2
Handle Straps	x 2
Ground Pegs	x 4
Nuts & Bolts	x 12

1.  
Please check all components.

2.  
Bolt the two side panels onto the underside of the ridge plate as shown. The two handle straps also need to be attached at this point.

4.  
Insert one of each end wire through the holes on the end panel as shown above. The end wires then push into the horizontal flutes, as indicated, running along the edges of the side panels. These hold the end panels in place. The wires are easily pulled out to varying depths to adjust for ventilation when necessary or for access.

5.  
Once you have positioned the cloche, secure by using the pegs provided.
