Heavy Duty Corner Brace

A corner brace can be fitted on both vertical and horizontal plains to give additional strength and rigidity to Heavy Duty Fruit Cages and frames.

Components per Corner Brace

18" Brace Tube x1

45* Two Way Joint x2

Loosen the joint on the cage framework and slide the two 45* joints onto the relevant tubes on the main frame. Retighten the joint.

Offer up the brace tube and insert into each 45* joint. Tighten all four grub screws on the joints.
