

LOSS OF ELASTICITY

The loss of elasticity and firmness in the skin is caused by a combination of one or more of the following:

1. Loss of muscle mass from repeated Botox injections and normal aging.
2. Loss of volume from shrinking facial fat pads commonly caused by excess sugar and/or alcohol.
3. Damage and/or loss of collagen and elastin fibers commonly caused by sun damage and/or gravity.

Osmosis offers patented and exclusive protocols for these concerns.

MUST-HAVES
