

Caring for your Concrete Homewares

By Mitchell Bink Concrete Design

To maintain longevity of your Concrete Homewares, we recommend they be used for decorative use.

All of our items are sealed with a high-grade, penetrative sealer which is food-grade safe and acts as a barrier against spills. Having said that, we do recommend that anything be wiped up within a reasonable time-frame otherwise it may etch through the sealer and leave a mark.

Following a “wipe as you go” principle will help your Concrete Homewares look beautiful for years to come.

Simply use a warm damp cloth to clean and avoid any vigorous scrubbing as it could compromise the sealer.

Please do not use your Concrete Homewares as a chopping board and avoid high impact knocks along the edges.

Our Concrete Homewares are not dishwasher or oven safe.

Please treat each item with care as they have been hand made with love for you.
