

How To's & Tips

HOW TO WASH A SPANDEX TABLE COVER

Hi, Emily here with MVP Visuals – your go to supplier for custom branded displays. We often receive the question; “How do you clean a spandex trade show table cover?” We get it, these stretch covers get a lot of mileage. They’re traveling to different environments and the goal is to stop traffic and market your brand. So, of course you want to keep your cover looking as sharp and clean as possible.

First of all DO NOT have them dry cleaned. Dry cleaning the covers will harm the material and likely ruin the print. These covers are machine washable. You want to make sure you wash with cool water, and tumble dry on low heat. The key is to remove from the dryer as soon as possible to avoid wrinkling. Once cleaned, fold along the seam lines and store in a dry place. It’s that simple! For more information or to request a quote visits us at mvpvisuals.com. Thanks for watching!
