

Best doors PS 60 Sliding Fire Door Set

The PS60 sliding fire door set is used where a large opening in a fire separation (up to 10m²) is required to be closed off in the event of a fire and/or in daily use.

The slider may be concealed behind an appropriate cavity wall. Automatic opening and closing is not currently available for Sliding Fire Doors.

The PS60 is a sliding fire door set. The door leaf can be faced in plywood or steel sheet, and is capped with steel channel to 4 edges and hung from a sliding track system.

A counterweight system, released by a fusible link or electromagnetic hold open devices that are linked to a fire detection system, closes the door leaf in the event of a fire.

For higher fire ratings and larger sized doors refer to the PS240 slider.

PS60 is not available as a smoke control door set.

The thickness of the PS60 door leaf is 65mm with an approximate leaf weight of at least 31kg/m²

Wall Type	Maximum Fire Resistance Rating Stability/Integraty/Insulation	Door Application	Max Leaf Height (mm)	Max Leaf Width (mm)
Timber Stud Wall Masonry Wall	-/60/30sm	Single	4000	3000

Notes:

The PS60 is not available as a 'pair' door set.

The maximum area per sliding door leaf is 10.5m².

Product Options

LEAF FACINGS

Plywood

Steel Sheet 0.9mm
