OUR STORY

In 2014, while living a "normal" life (9–5, mortgage, kids), our youngest son received a life-changing medical diagnosis. That will make you rethink your priorities.

After overcoming that (go, Wyatt!), our outlook on life changed and we decided to pursue our travel dream. We sold our house and took off in an RV for a year across North America while growing the business.

Now settled in Austin, our collections are inspired by the wonder and delight of that journey and intended to make each day a little better, no matter where you may be.

"I've been trying to burn 'cleaner' candles, so I was super happy to come across these. The price point is amazing for how big they are, and the scent throw is awesome... the neutral packaging is discrete and sophisticated."
