

SPEEDWELL

Vigilante Bags – Harley Davidson

Check the Speedwell Supply YouTube channel for an install video.

If any of the instructions are beyond your skill set, we strongly recommend taking your motorcycle and saddlebags to a professional mechanic for installation.

In the Box

- 2 racks with saddlebags (remove saddlebags from racks for install)
- 1 bolt pack (inside saddlebag)
- 2 quick release pins (installed)

Saddlebag Install Instructions

1. If your motorcycle has side-mounted taillights, remove the taillights.
2. Remove two strut bolts on one side of rear fender.
3. Saddlebags are directional, make sure that you have the correct rack on the correct side by verifying that the taillight hole on the rear of rack is facing the rear of the bike.
4. Gather two 0.5" black spacers two large bolts. Place bolts through the rack mounting holes and place spacers in between the rack and your motorcycle's rear fender to prevent paint damage.
5. Gently screw in racks to fender. Notice the slotted fitment and adjust your rack position to your preference and then tighten the bolts.
6. Repeat process for other side. Make sure that the rack placement matches on both sides.
7. Place the bags in racks. Secure the bags with either the included quick release pins or solid mount bolts. Note that with the quick release pins your saddle bags may vibrate when your bike is in motion.

Taillight Relocation Kit Install Instructions

IF YOU ARE NOT EXPERIENCED IN ELECTRICAL WORK, SEEK HELP FROM A PROFESSIONAL MECHANIC

1. Remove saddlebags from racks.
2. Remove motorcycle seat.
3. Unbolt subframe and remove rear fender, subframe and saddlebag racks as one unit.
4. Unscrew mounting nipple from replacement taillight.
5. Feed wire through saddlebag rack porthole with turn signal facing outside and rear of motorcycle. Slide taillight wires through mounting nipple and secure taillight to rack by screwing together.
6. Splice factory taillight wires six inches below connector underneath seat.
7. Solder wires.
8. Bolt rear fender, subframe and saddlebag racks back to your motorcycle.
