

ROOFTEC DRY RIDGE

6M DRY RIDGE ROLLS

Use: For sealing and ventilating roof ridges

Dimensions: 6m x 320mm

Ventilation: 5000mm² Airflow per linear meter

Materials: Pleated aluminium strips connected by high strength polypropylene woven fabric. The aluminium strips are stitched and glued to the fabric. Each roll is finished with two 15cm butyl Adhesive strips.

Properties: The ridge roll is air and moisture permeable, and provides ventilation of the ridge. It has a high resistance to weather conditions and UV Radiation
