

NOVIA®

Cold Weather Foil Tape

Novia Cold Weather Foil Tape is high strength single-sided 30 micron aluminium foil tape. The cold weather solvent acrylic adhesive creates a tape that can be used for jobs regardless of temperature.

Cold Weather Foil Tape should be used as a lap seal for Vapour Control Layer (VCL) applications in walls and ceilings of insulated building structures.

This tape is also suitable for use in damp proof membrane and Radon protection applications as a single sided lap seal.

Full installation guidance can be found on relevant product datasheets.

- ✓ **Highly reflective of both heat and light**
- ✓ **30 micron foil**
- ✓ **Low application temperature of -20°C**
- ✓ **Low water vapour transmission rate**
- ✓ **Available in different widths**
- ✓ **Suitable for both vapour barrier and radon barrier applications**
- ✓ **Install on surfaces free from grease, dust and loose materials**
- ✓ **Class O Fire rating**

Roll size:		
Standard width	48/72/96	mm
Roll weight	0.45/0.65/0.85	kg
Roll length	45	m
Packing	24/16/12	Rolls per box
Nominal technical data:		
	Value	Units
Backing Thickness	30	Micron
Total Thickness	70	Micron
Tensile strength	45	N/25mm
Elongation	3	%
Service temperature	-35 to +120	°C
Applying Temperature	-20 to +40	°C
