

GOLF CART CONNECTION DIAGRAM

GOLF CART IGNITION SOURCE THAT PROVIDES VOLTAGE WHEN KEY IS TURNED ON.
 TO BYPASS THE KEY FUNCTION, CONNECT TO THE SAME POSITIVE BUS BAR AS THE CART CONTROLLER.
 BYPASS WILL ALSO ALLOW CONSTANT VOLTAGE TO THE GAUGE DISPLAY AND CONVERTER 12 VOLT OUTPUT.

The gauge is rated for any 9-72V power source.

CANBus

Seal red and yellow wire away from each other. For use only without fuel gauge.

12V+
