ZEBRA STRONG - WE REFUSE TO BE BROKEN

# Smart sustainable developments zero damage, zero waste

You can install ground sockets by simply positioning upright when pouring concrete footings, creating a perfect finish, or retrofit to heal existing developments one foundation at a time

Because Smart Sustainable Foundations are made using a new-age Smart Plastic that self-heals, foundations remain reusable impact after impact and you continue saving for decades.

*The world's most environmentally friendly plastic made from recycled petroleum waste*

# Maintenance is fast & efficient only cost is labour

Response to infrastructure failures is fast and efficient. No digging, heavy labour. No disturbance to public or underground services and time on location is reduced to seconds, greatly improving workplace safety and the only cost is labour

**1** Secured using friction, items remain perfectly aligned, safe and secure year after year. No breakable components

**2** Ergonomic tools are used to remove items from a standing position, facing on-coming traffic. Tools work every time, and you continue saving for decades

## Unit includes

1. 350 mm Ground Socket
2. Self-locking Taper
3. Cap

Removal Tools required

One-off purchase, no replacement parts required

**ALTERING DEPTH:** Sockets are 350 mm depth but can be easily truncated at any horizontal rib to reduce depth to 150 mm. To extend depth you require additional ground sockets that are truncated and inserted into existing sockets to extend depth by 300 mm increments. IE: For 650 units you must purchase one box complete units and one box of sockets.

Details	Dimensions	Weight
25 Complete units	[400 x 400 x 400 mm]	13 kg
25 Ground Sockets	[400 x 400 x 400 mm]	8 kg

Sold in boxes of 25 complete 350 mm units and 25 ground sockets
