

Dumpsters (DCII)

www.multiverregamingterrain.com

Read the instructions carefully before putting the kit together. The model can be glued with PVA glue. A file and a sharp hobby knife may be needed to remove the bits of the sprue from the parts

Some of the pieces in this set are very fragile - carefuly remove them with a hobby knife before assembly.

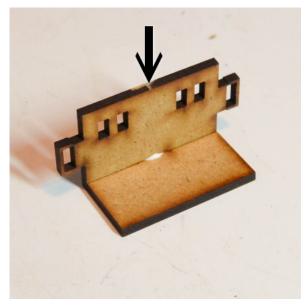

2

Start the assembly with these two pieces:

3

Glue the back wall on top of dumpster floor as shown in the picture:

Add the two side walls to the piece:

5

Finish the main body by adding the front wall to the dumpster.

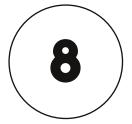

Prepare these two pieces:

Glue them between the side handles:

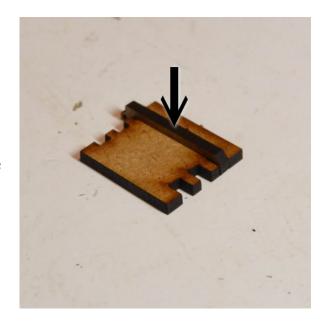

For each of the flaps, prepare these four pieces:

Glue the narrow pieces on top of the flap like shown:

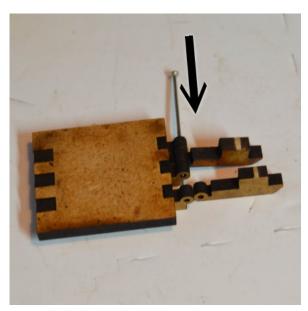

Arrange the flap and the back hinges as shown:

Drive an office pin or a piece of ~1mm wire (e.g. a paper clip) through the holes.

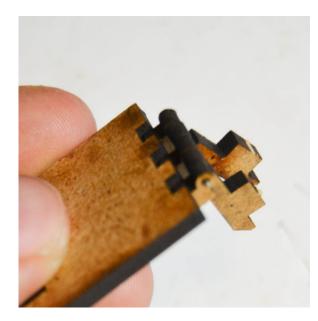

Clip the excess wire as shown. DO NOT point the piece you are clipping towards yourself or any human or animal!!!

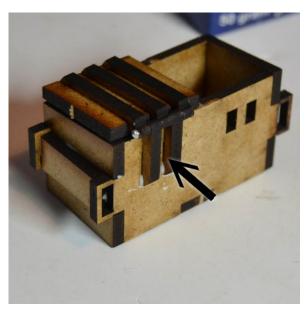

[13]

Put a bit of superglue on each end of hinge assembly.

Glue the completed flap to the holes in the back of the dumpster.

15

Add the second flap and hold them both in place to assure that they are not skewed.
