

## Bus Shelters (DC24)

[www.multiversegamingterrain.com](http://www.multiversegamingterrain.com)

Read the instructions carefully before putting the kit together. The model can be glued with PVA glue. A file and a sharp hobby knife may be needed to remove the bits of the sprue from the parts

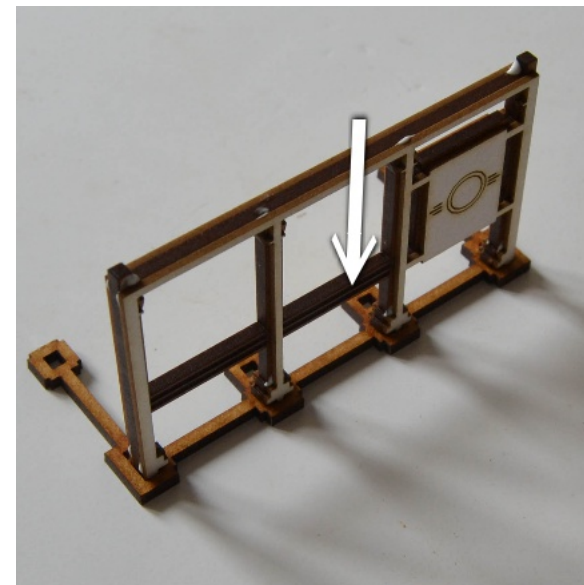

Add this piece to the shelter's base:

Glue the matte board detailing to the front of the piece as shown:

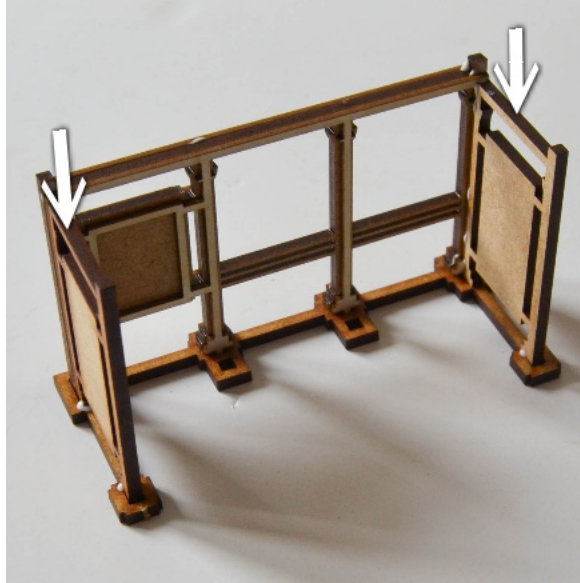

Glue the matte board detailing to the back of the piece:

**4**

Add the two side walls:

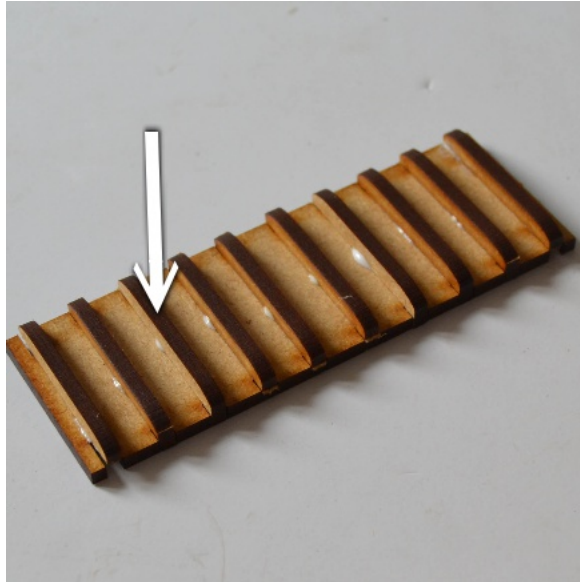

**5**

Add the poster frames to both walls (on both sides).

**6**

Glue the roof 'ribs' on. Please note that the pegs on the two outermost ribs are positioned differently to make way for the pegs on the shelter itself.

**7**

Finish the piece by adding the bench in the middle of the shelter (matte board bench piece not shown).
