

Girder Overpasses (DC27)

www.multiversegamingterrain.com

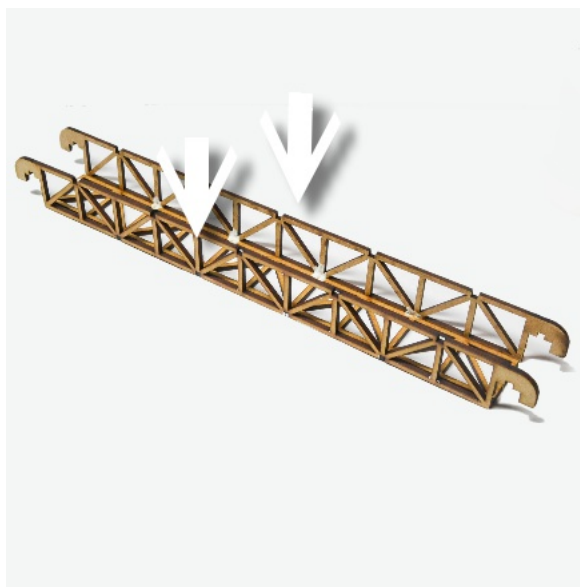

Read the instructions carefully before putting the kit together. The model can be glued with PVA glue. A file and a sharp hobby knife may be needed to remove the bits of the sprue from the parts

Lay the piece without hooks flat as shown.

Add the two side pieces to the model.

Add the second piece without hooks on top of the overpass.

4

Add the two narrow pieces to the back of each of the directions boards.
