

## Phone Booths & Hydrants (DC3O)

www.multiverregamingterrain.com

Read the instructions carefully before putting the kit together. The model can be glued with PVA glue. A file and a sharp hobby knife may be needed to remove the bits of the sprue from the parts

Lay the floor piece flat as shown.

Glue the two side walls to the base.

Assemble the phone as shown.

Add the front and the back wall, the booth counter and the phone as shown.

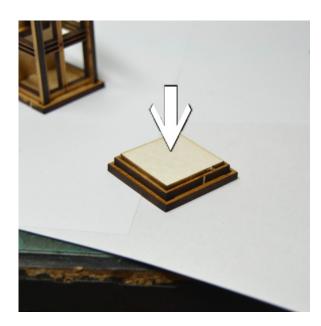

Add the matte board detailing pieces to the side walls.

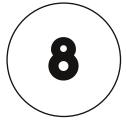

Assemble the roof using the two HDF squares and the matte board square as shown.

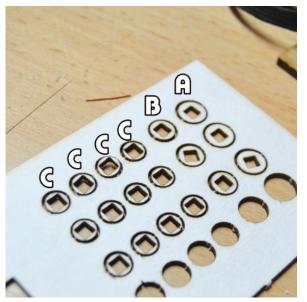

**(7**)

Add the roof and the matte board detailing on the back to the booth.

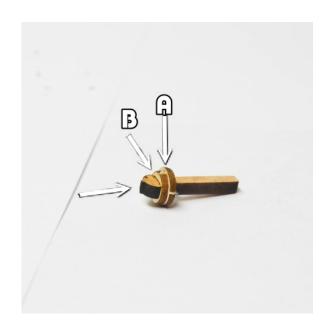

There are four sets of rings on the matte board sheet, each consisting of one A, one B and four C pieces.

Drive the narrow piece with a rounded cap through B and A rings as shown.

Add the cross-ring just below A ring.

Add the three HDF rings with small protrusions to the piece.
