

Gallows (TBAOOI)

www.multiversegamingterrain.com

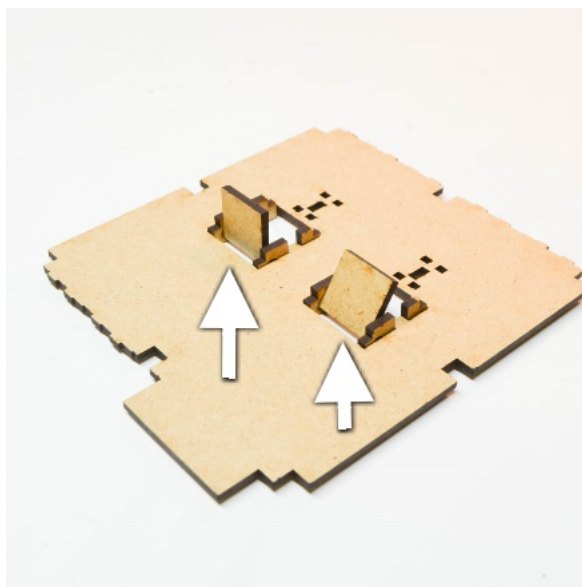

Read the instructions carefully before putting the kit together. The model can be glued with PVA glue. A file and a sharp hobby knife may be needed to remove the bits of the sprue from the parts

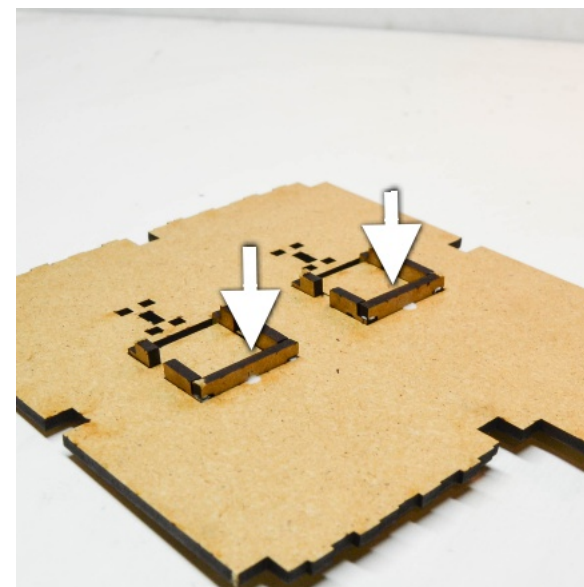

Prepare the hatch as shown. Don't glue the side pieces to the hatch.

Turn the floor piece upside down and glue the hatches as shown.

Add the piece WITHOUT square hole to the hatch assembly as shown.

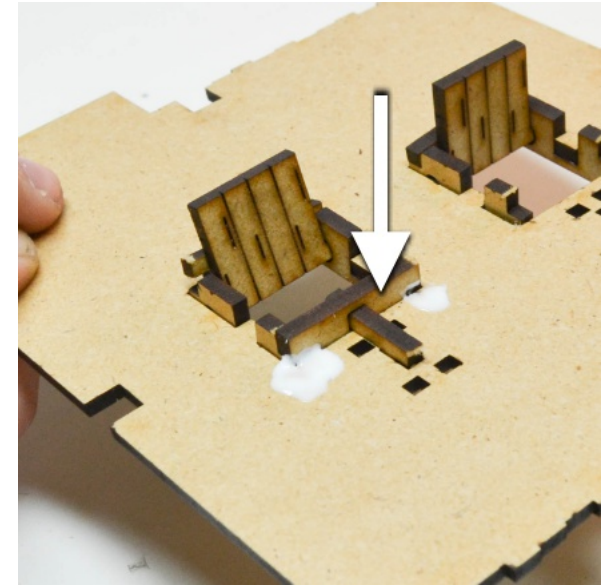

4

Prepare the levers as shown. Once again, DON'T glue these pieces together.

5

Add the lever to the model as shown, gluing only the piece connecting with the hatches supports.

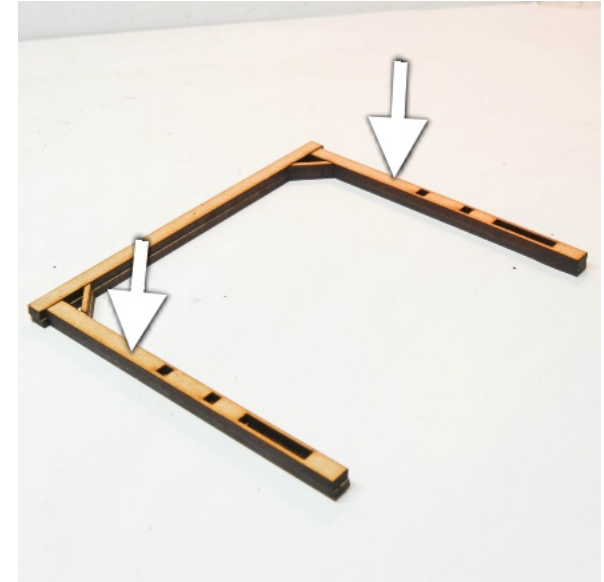

6

The top of the piece should look like this now.

7

Glue the main supports together, sandwich style.

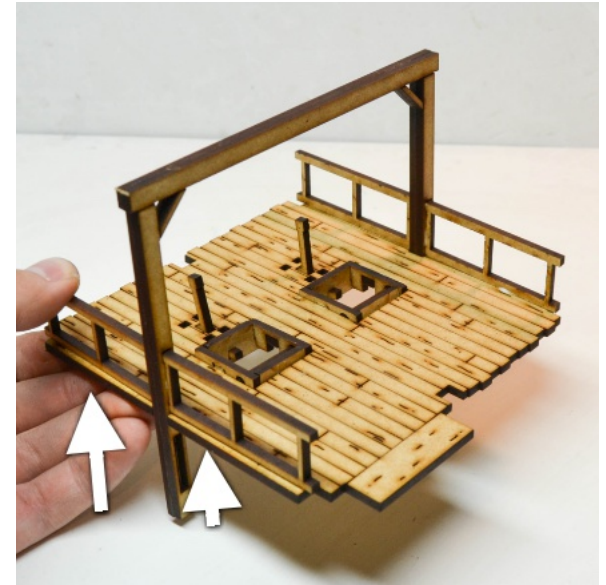

8

Driver the railings into the holes in the supports.

9

Add the floor piece to the support frame...

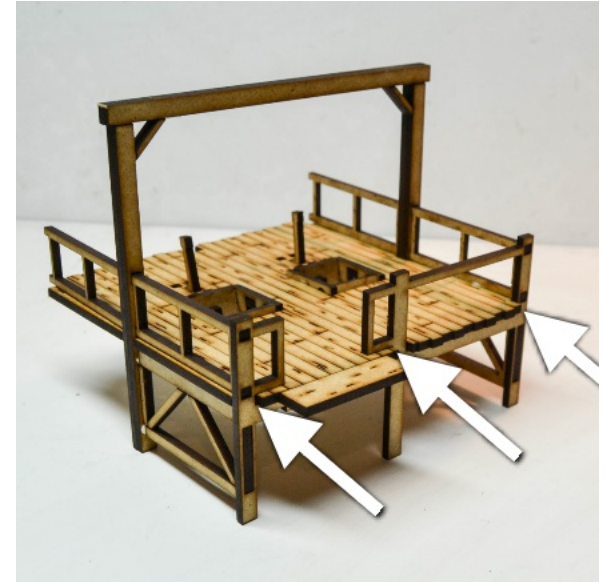

10

...and quickly glue the lower supports to the piece, to stabilize the floor.

11

Add this railing piece to the model.

12

Add the lower supports on the other side of the frame.

13

Hold them together with the second railing piece.

14

Add the second layer of HDF on this side...

15

...and on the other.

16

Add these two pieces to each lever.
