INTENSITY

DECAF ETHIOPIA

This coffee is sourced from the west of Ethiopia in an area known as Limu Kossa, where farmer and landowner Gidey Berthe grows coffee on a 350 hectare farm. The farm spans altitudes between 1840-2130 masl giving it a fruit-like complexity. The farm is meticulously maintained, from the trees to the signs dividing the lot sections. This is the best decaffeinated coffee we have ever tried.

SOURCING

VARIETY

Heirloom Typica

PROCESS

Sun-dried Natural
