## ETHIOPIA ARDI G1

Welcome to Ethiopia. Ardi is a coffee grown in southern Ethiopia's Guji Zone. Coffee farming is the main source of income for the approximately 3,000 people who live in this area and contribute the coffee that makes up Ardi. We had the privilege of visiting the farmers who produce Ardi and see first-hand the high quality, oversight and care that goes into this natural sun-dried. This process makes this coffee sweet and fruity, producing notes of tropical and purple fruits in the cup.

## SOURCING

VARIETY

Sidama Heirloom Typica

PROCESS

Sun-dried Natural
