

HONDA

GENERATORS/PUMPS/ENGINES

2018-2019

WELCOME TO HONDA –
the No.1 outdoor power equipment
brand in the world.

Operating out of New Zealand for over
40 years, Honda Power Equipment
has been providing kiwis with reliable,
quiet, emission conscious 4-stroke
power equipment that has remained
unsurpassed.

Whether you are a home gardener, an off
the grid farmer, a mobile contractor or a
multi-national business, it is all about being
successful in your pursuits. This is where
the old adage of “no one regrets buying
quality” really comes into play. When you
choose Honda you actually take it one
step further than this – as you are now
working with the best – with the best
working for you!

Enjoy perusing the range, get excited, and
then head to your nearest Honda dealer.
You're on the best track and your Honda
Experience is about to start first time!

Ross Allan
Manager, Honda Power Equipment NZ

HONDA

HONDA ADVANCED 4-STROKE TECHNOLOGY

Honda are pioneers in 4-stroke engine technology and continue to lead the way in
producing top of the range engines with superior performance and power.
Each engine efficiently delivers powerful, quiet and clean performance.

FUEL EFFICIENT & ENVIRONMENTALLY-FRIENDLY

Honda's 4-stroke engine technology offers
superior fuel economy using approximately
half the fuel of its 2-stroke counterparts.
Its low vibration engine reduces
user-fatigue making it the perfect engine
for high-usage power equipment. Cleaner
burning performance, low vibration and low
noise also mean it's much healthier for the
environment and the operator – they are
built like no other.

NO MORE FUEL MIXING

With Honda's 4-stroke engines there is
no need for fuel mixing. All motors run on
unleaded petrol and because you don't
need to mix oil with petrol your engine will
run cleaner and longer.

POWER AND TORQUE

Larger diameter valves maximise the power
output and support performance over its
entire speed range. Whether supplying
power on your family camping trip, restoring
lost power in a storm or shifting water from
your tanks to your troughs, Honda Pumps
and Generators will deliver time after time.

STARTS 'FIRST TIME EVERY TIME'

Honda engines are renowned for being
consistently easy to start. From our unique
automatic mechanical decompression
system to heavy duty recoil ropes to more
advanced variable ignition timing, our
engines are designed with quick, easy
starts in mind.

Your motor will start 'first time every time',
a unique feature that will make your
experience with Honda that much better.

THE HONDA ADVANTAGE

Why choose Honda? Because Honda won't let you down. Our products are built to go the distance and with nearly seventy years of proven performance you won't be disappointed.

THE HONDA FEATURES THAT MAKE OUR PRODUCTS STAND OUT FROM THE REST

- **Easy to start** – you won't believe it till you try it. One pull and the engine starts.
- **No fuel mixing - just petrol.** Simply fill up your new Honda and get to work.
- **High torque and low RPM** resulting in excellent performance and increased longevity of your engine.
- **Better fuel efficiency** – just one of the many benefits of a 4-stroke engine.
- **Less noise** – engines operate well below acceptable noise standards.
- **It will run cleaner with low emissions** – Honda's 'caring for the environment' ethos has been actively in place since 1964.
- **Top in reliability** – don't take our word for it, ask any contractor with a Honda product.

There will always be a certain pride and status gained in knowing and showing your friends and neighbours that you own a Honda. It is a premium product that shows you want more than any old product to work outdoors with. You want the very best that is on offer. You want your lawns to look their finest, your back up power to be 100% reliable and your engines to be the most efficient and robust. What you want is a Honda.

4-YEAR WARRANTY

Honda offer up to a 4-year* Domestic Warranty on nearly all our power equipment range.

We do this because we know our products last and we stand behind them 100%. Don't just take our word for it, the countless contractors and domestic users that count on Honda Products should hopefully be more than enough to convince you. For commercial warranty details please see your local dealer.

*special conditions apply

GENERATORS

GENERATOR FEATURES

Honda Generators constantly incorporate the type of innovations and cutting edge technology that no other manufacturer can match. When it comes to noise and emissions, Honda Generators are the quietest and cleanest on the market.

HONDA 4-STROKE ENGINE

At the heart of every Honda Generator lies our Honda GX commercial grade engine. These 4-Stroke engines are recognised as the industry leader in providing reliable, quiet and fuel-efficient power. In fact, they run about 30% more fuel efficiently than comparable side-valve engines.

RUGGED FRAME

All Honda Power Equipment Industrial generators are incased in a high quality steel frame designed to provide not only a tough outer protection layer that can handle the knocks on the worksite, but also enables them to be easily transported from job-to-job or out on the farm.

REMOTE AND AUTO START

When your power goes out it's not usually a fine sunny afternoon. Power outages tend to be caused by adverse weather so being able to start your generator without going outside is a huge bonus. Another must is a generator that starts as soon as the power goes out. These are both excellent add-on features that are available on a selection of Honda Generators.

(Available on EU30is, EU70is and EG5500CXS)

D-AVR (DIGITAL AUTO VOLTAGE REGULATOR)

The Honda EM10000 and EG Series of generators feature the D-AVR (Digital Auto Voltage Regulator). The D-AVR is designed to hold the voltage stability within a +/- 1% change during operation. The D-AVR adjustments are driven off the main winding, versus a sensor winding in conventional AVR systems. Additionally, the D-AVR is protected from overheating by a thermistor.

LOW NOISE, LOW EMISSIONS

Honda's 4-stroke engine technology offers superior fuel economy using approximately half the fuel of its 2-stroke counterparts. Cleaner burning performance, low vibration and noise make it much healthier for the environment and the operator. Honda engines meet all international health emission regulations.

4-YEAR DOMESTIC WARRANTY

Honda products come with a 4-year domestic warranty* and with regular servicing by a Honda authorised dealer and using only Genuine Honda Parts and Accessories, your Honda product will work hard for many years.

Honda has a comprehensive dealer network that covers all of New Zealand with highly trained technicians and knowledgeable sales staff to help you make the right choice first time.

*Commercial warranties are between one and three years depending on the product. Please check with your Honda dealer at time of purchase.

INVERTER TECHNOLOGY

Inverters produce the cleanest power of all. These units are ideal for sensitive electronics, such as computers. Inverter generators offer a number of other benefits, including less noise, lighter weight and greater fuel efficiency when compared with traditional models. Honda revolutionised the use of inverter technology in portable generators with our Super-Quiet EU series.

PARALLEL FUNCTION

Need even more power? Parallel capability is an additional benefit of inverter technology. Using a special cable you can link two EU10i, two EU22i, two EU30 Handy, or two EU30is generators together to get as much as double the output. (Please note: you can only parallel two identical units together.)

COMMERCIAL WARRANTY

If you are buying a premium product you expect a premium warranty – especially if your livelihood and business depends on that product. Honda Power Equipment products are the No.1 choice amongst contractors so we do our best to ensure the needs of commercial operators are met.

For more details on commercial warranties, speak to your local Honda dealer.

Honda is the world's No.1 choice for back up power. So no matter what you need to power, you can be confident Honda has the right generator for you.

WHERE CAN YOU USE YOUR GENERATOR?

Anywhere you have a need for back up power you can take your generator. Whether you are camping, working on site or creating back up power for home; having a generator on hand when there is no power source is a necessity for every home or business.

WHAT IS START UP POWER?

Start-up power is simply the power an appliance needs to begin operating. Appliances that run an electric motor (air conditioners, drills and sanders) can initially require 3-4 times the operating power when first switched on.

THE POWER FACTOR

Many generator manufacturers quote a 'power factor' which can range from 0.8 to 1.0. Power factor is a measurement to calculate the usable power of a generator.

To work out the usable wattage of a generator, use the following formula: kVA x 1000 x power factor = usable power (watts)

At Honda, we quote a power factor of 1.0(pF), so you can be confident that a 3kVA generator produces 3000 watts.

GENERATOR USAGE GUIDE

Honda Generators provide the power you need when you need it. Use this chart to work out what generator is right for you.

1. Identify the products and/or tools you intend to operate with your generator.
2. Determine the power requirement for each product (allow for the starting load).
3. Total up the wattage for the products which may be operated simultaneously.
4. Choose a generator with a rated output of at least your total, plus around 10% contingency.

INVERTER GENERATORS

EU10i

Featuring a microcomputer-controlled sinewave inverter that guarantees quality electricity, it's ideal for use with frequency-sensitive electronics such as laptops.

- 8 amp/12 volt DC, maximum 1000W/240 volt AC can run appliances and charge batteries simultaneously
- Powered by a Honda GXH50T Engine
- Up to 8 hours continuous operation on a full fuel tank @ 1/4 load*
- Lightweight 13kg

EU22i

Our newest generator, the EU22i, is 10% more powerful than its predecessor, remaining just as light and quiet as before.

- Maximum output of 2200W/240 volt AC and 8.3 amp DC can run appliances and charge batteries simultaneously
- Powered by a Honda GXR120 Engine
- Up to 8 hours continuous operation on a full fuel tank @ 1/4 load*
- Delivers greater fuel efficiency via the built-in Eco-Throttle*
- Parallel connection compatibility
- Lightweight 21kg

Engine 20% larger than the EU20i Generator

*With Eco-Throttle switched on when rated at 1/4 output. Usage applications are recommendations only.

EU30is

Powered by a Honda GX200, the EU30is offers an excellent choice for domestic and commercial use.

- 12 amp/12 volt DC, maximum 3000W/240 volt AC can run appliances and charge batteries simultaneously
- Convenient electric start and recoil start back-up
- Offers up to 20 hours continuous operation on a full fuel tank @ 1/4 load*
- Lightweight 59kg
- Wheel kit available

EU30ik

The handy EU30ik is powered by a GX160 engine, so plenty of power in commercial settings.

- 8.3amp / 12 volt DC, maximum 3000W/240 Volt AC can run appliances and charge batteries simultaneously
- 'H' shaped fold down handle and large diameter wheels
- Offers up to 7.7 hours continuous operation on a full fuel tank @ 1/4 load*
- Lightweight and portable 35kg

EU70is

One of the most popular inverter generators, the EU70is can tackle pretty much anything.

- Maximum 7000W/240 volt AC can run appliances and charge batteries simultaneously
- Offers up to 18hrs continuous operation on a full fuel tank @ 1/4 load*
- EU70is incorporates electronic fuel injection
- Electric start and recoil start back-up
- Noise level 52dB(A) @ 1/4 throttle
- 19.2 litres fuel tank
- Dry weight 118.1kg
- 32 Amp plugs can be fitted
- Optional lifting hook available

*With Eco-Throttle switched on when rated at 1/4 output. Usage applications are recommendations only.

FRAMED GENERATORS

EG5500CX/EG5500CXS

Robust and powerful, framed generators are ideal for commercial, rural and back-up emergency power use.

- 8.3 amp/12 volt DC, maximum AC output 5500VA
- Continuous Operating Hours 8.1 at 5KW
- GX390 Engine
- Large fuel tank capacity 24 Litres
- Reduced noise with large muffler 71dB(A) @ 7 metres
- Recoil or Electric Start
- Dry Weight 89kg

EM10000

A heavyweight performer, the EM10000K1UH is designed for the demanding user requiring an off-grid power system or a small business where they cannot afford to be without power.

- 9000 watts, 240V
- Honda commercial GX engine & heavy duty frame
- V-Twin engine
- Electric start
- 240v 50Hz
- Wheel kit & lifting hanger hook options available

PUMPS

PORTABLE PUMPS

Designed to transfer clean water from water tanks. Ideal for most domestic and rural water pump uses.

WX10

Perfect for homeowners, gardeners, boat owners and more. The WX10 is lightweight, compact and convenient.

- 25cc, Mini 4-Stroke engine
- Economical 1" volume pump
- Delivers 120L/min capacity
- Maximum suction head 8m
- Maximum total head 37m
- Dry weight 6.1kg

WX15

The robust WX15 handles large volumes of clean water, making it ideal for irrigation, drainage and general purpose cleaning.

- Economical 1.5" volume pump
- Delivers 280L/min capacity
- Maximum suction head 8m
- Maximum total head 37m
- Dry weight 9.1kg

GET HELP CHOOSING THE RIGHT HONDA PUMP

Honda has a pump to suit any need. Do you need water supplied to your paddocks? Are you in a flood prone area and want to shift muddy or debris filled water? Or do you need a high-powered flow of water for fire control?

Whatever your intended purpose, talk with your local Honda dealer about what you need to do with your new pump and they will be able to help you find the right Honda pump for the job.

For a list of dealers close to you, visit hondapowerequipment.co.nz/find-a-dealer

PERFORMANCE CURVES

TRANSFER PUMPS

Used by water carriers, construction firms and hire companies who need higher water flow rates than the mini pump range.

WB20

A general purpose centrifugal pump powered by an easy starting Honda GX120 OHV engine.

- Delivers 620L/min capacity
- Maximum suction head 8m
- Maximum total head 32m
- Portable 2" volume pump

WB30

With capacity to deliver 1100 litres per minute, the tough WB30XT can handle big, time consuming projects with ease.

- Delivers 1100L/min capacity
- Maximum suction head 8m
- Maximum total head 23m
- Portable 3" volume pump

TRASH PUMPS

Honda Trash Pumps are specifically designed for job sites and applications where high volume trash water capacity is required. Honda WT series pumps have a rugged full frame protection, quick release clean-out, and durable silicone carbide mechanical seals.

WT20

The powerful WT20 is a 2" portable trash pump with a 30m head that delivers a maximum capacity of 650 litres per minute.

- Delivers 650L/min capacity
- Maximum suction head 8m
- Maximum total head 30m
- Portable 2" trash pump
- Honda GX160 OHV engine

WT30

The WT30 is the largest trash pump in Honda's range, boasting a massive 1300 litres per minute capacity with a 27m head.

- Maximum suction head 8m
- Maximum total head 27m
- Portable 3" trash pump
- Delivers a massive 1300L/min capacity
- Honda GX270 OHV engine

HIGH HEAD/PRESSURE PUMPS

Honda high head/pressure pumps move more water economically, pump water higher and fight fires from a safer distance.

BM65H 2"

Expect high performance and efficiency from this excellent fire fighting pressure pump.

- Large pump casing with raised suction port and inbuilt non-return valve for better priming capabilities.
- Computational Fluid Dynamics designed hydraulic components.
- Lightweight high grade corrosion resistant materials.
- Max. Flow - 450lpm
- Max. Head - 104m
- Twin Impellor pump
- Onga wet end

LIGHT CHEMICAL PUMPS

RPP2PUMPE

The RPP2PUMPE Self-Priming Centrifugal pump is lightweight and chemically resistant for general service on water, salt water, wastewater, mild acids and bases. A self-cleaning double volute keeps pump free of settled solids.

- Max. Flow – 650lpm
- Glass-reinforced polyester, polypropylene mould
- Built-in check valve
- Self-Priming
- Portable lift handle
- GX200 engine
- 1.5" & 3" available
- Recoil start option available

ENGINES

Honda is the world's largest manufacturer of engines and has earned its reputation for unsurpassed quality, performance and reliability. When you choose a Honda engine, or a product powered by Honda, you're getting an engine you can count on, now and in the future.

SUPERIOR PERFORMANCE

Better fuel efficiency, higher power output, quieter performance and easier to use. No matter how you define superior engine performance, Honda engines set the standard.

What's our secret? Best in class engineering and technology. From our amazingly compact mini 4-stroke engines to the powerful GX Big series, Honda engines are truly built like no other.

SUPERIOR RELIABILITY AND QUALITY – GUARANTEED.

Honda sets the standard for reliable, hard-working engines. Our engines are built using high-quality components; designed for high performance in the harshest environments.

But don't just take our word for it. Honda stands behind our engines with an industry leading three year commercial warranty on all GX engines, and GXV engines 100cc and larger.

EASY TO START

Honda engines are renowned for being consistently easy to start. Our unique automatic mechanical decompression system, heavy duty recoil ropes and advanced variable ignition timing, makes for quick and easy starts.

GX MINIS

Compact and ultra-lightweight the GX Minis deliver excellent power and quiet performance. Used in a range of applications including lawncare and industrial equipment.

- Lighter piston minimises vibration
- Powerful and compact series
- Fully inclinable OHC engine
- Mini 4-stroke

GX Mini sizes:
GX35, GXH50, GX100

GC, GCV & GSV SERIES

Specifically designed for home-use power equipment applications, the GCV & GSV series provide an ideal source of power for a variety of consumer products.

- Horizontal and vertical shaft available
- Ideal for agricultural equipment
- Lightest engines in their class
- OHC domestic engine

GC, GCV & GSV Series sizes:
GC160, GCV160, GCV170, GSV190

COMMON APPLICATIONS FOR HONDA ENGINES

- Pressure washers
- Commercial lawn and garden equipment
- Tillers / cultivators
- Generators
- Forestry equipment
- Construction / Industrial equipment
- Agricultural equipment
- Small vehicles
- Water pumps
- Go Karts

Honda engines are used in a wide variety of industries. Honda will work with you to make sure you get the right Honda engine to power your application. This leads to a long lasting engine, which in turn means you'll have more satisfied and loyal customers.

With Honda on your side, you never have to worry if you've got the right engine, we make sure you've got the right model to fit your needs.

GX MID SERIES

Honda's GX series engines are legendary for superior reliability and performance. Lower noise levels, lower vibration, and lower emissions – without sacrificing power output or performance.

- OHV, Horizontal shaft, single cylinder industrial petrol engine
- Designed for the most demanding commercial applications
- Forged steel crank shaft

GX Mid Series sizes:

GX120, GX160, GX200, GX270, GX390

GX BIG SERIES

Honda V-twin engines offer higher horsepower, improved adaptability, quiet operation, and greater fuel efficiency.

- Two horsepower choices
- OHV commercial engine
- New generation V-twins
- Horizontal shaft

GX Big Series sizes:

GX630, GX690

GXV SERIES

Professionals rely on the GXV series to deliver reliable power, easy starting and fuel efficient performance – day in day out.

- Precision engineered components result in lower vibration
- Three models to choose from
- OHV commercial engine
- Vertical shaft engines

GXV Series sizes:

GXV160, GXV390, GXV530

GXV BIG SERIES

All the benefits and applications of the GX Big Series is also available in a vertical shaft.

- Racing inspired forged steel connecting rods
- Two horsepower choices
- New generation V-twins
- OHV commercial engine
- Vertical shaft

GXV Big Series sizes:

GXV630, GXV690

PARTNER WITH THE BEST

WHY NEW ZEALAND'S BEST MANUFACTURERS USE HONDA ENGINES

Approximately 70% of the general purpose engines manufactured by Honda are supplied as OEM engines to other manufacturers of power products. Honda has over 3,600 OEM (original engine manufacturer) customers in 86 countries around the world. In New Zealand, Honda engines are a popular choice for many industries including forestry, farming and industrial equipment.

Honda engines have built a reputation of quality, performance and reliability. Better fuel efficiency, higher power output, quieter performance, easier to use, economical, low emissions and advanced 4-stroke engine technology. No matter how you define superior engine performance, Honda engines set the benchmark adding value to your company and products.

THE RED STICKER IS YOUR GUARANTEE

The 'Honda New Zealand Approved Manufacturer' red sticker is the consumer guarantee of quality. Manufacturers who import engines direct from overseas and not through Honda New Zealand channels are not eligible for the support and warranty through Honda in New Zealand.

The red sticker ensures that your new product has been matched by Honda's New Zealand technical experts to the engine in each OEM product. You will get nationwide support and the engine is backed with a 3-year commercial warranty*.

For more information visit:
hondapowerequipment.co.nz/commercial

ALWAYS LOOK FOR THE RED STICKER

The Honda NZ Approved sticker is your only guarantee.

- Honda's NZ technical experts have matched the engine to each OEM product
 - Nationwide support
- Backed with a 3-year commercial warranty*

*Conditions apply.

GENUINE PARTS & ACCESSORIES

Honda produces an extensive range of Honda Genuine Parts and Accessories and specially formulated engine oils. Designed and manufactured to exact specifications, using Honda Genuine Parts, Accessories and Oils is the only way to keep your Honda engine in peak condition. Make sure when servicing your Honda engine, the work is carried out by an authorised Honda Power Equipment dealership.

REMOTE STARTERS

The **ACPWSM Wireless Start Module** is appropriate for all applications where equipment is required to operate remotely using a wireless transmitter & receiver medium. This module provides up to 75m range without the need for extra cabling.

The **ACP2WSM** – is a flexible controller module that may be fitted to the EU70is, EG500CXs and the EU30is Series generator. Used for the remote automatic operation & control of engines, fitted to generators, pumps and scores of other applications which can be driven via a two wire contact closure signal.

PREMIUM ENGINE OIL AND FUEL STABILISERS

Honda 4-Stroke Power Equipment Oil is designed for use in all Honda Power Equipment and their engines.

Benefits of using Genuine Honda Engine Oil and Fuel Stabiliser:

- Increased rust and oxidation inhibitors to fight corrosion from the environment
- Shear stable polymers to resist viscosity breakdown under high rpm and high-load conditions
- Superior anti-foaming characteristics to better protect the engine at high rpm
- Additional anti-wear additives for improved bearing protection
- Add Honda Fuel Stabiliser to keep carburetor and fuel system clean.

HONDA ALL THE WAY

Relied on by farmers, tradies and businesses nationwide, Honda products are premium products backed by a global giant.

Honda's commitment to creating products that improve the quality of people's lives goes well beyond automobiles and motorcycles. Since 1953, Honda has manufactured over 100 million power products worldwide.

Honda continues to be a leader in the development of low-emission, fuel efficient, environmentally-friendly 4-stroke engines for use in generators, water pumps, lawnmowers, outboard motors, and many other power equipment applications.

To view the full Honda Lawncare range visit: hondapowerequipment.co.nz/lawncare or visit your local Honda dealer and pick up the latest **Honda Outdoor & Garden Power Equipment** brochure.

POST HOLE BORER

PHB35

A great piece of gear for lifestyle block owners and fencing contractors. At just 10.5kg it is easily transportable between jobs.

- Fitted with a GX35 4-stroke engine with 1.0kw(1.3HP) net power @ 7000rpm.
- High quality European gearbox
- Speed 160-200rpm
- Gear 40:1 reduction
- A range of auger sizes available

IDEAL FOR
Contractors

POWER CARRIER

HP500

Honda Power Carriers take the backache out of shifting heavy materials reducing work-related injuries. Working across unstable or steep terrain, you'll wonder how you ever got by without one.

- Professional grade GX160 engine
- Loads of up to 500kg
- Handle inclines and declines of up to 15 degrees

IDEAL FOR
Contractors

BRUSHCUTTER

UMK435U

Makes tough jobs easy with a 4-tooth metal blade plus a heavy-duty tap-and-go nylon line head.

- Generation II, 35cc, Mini 4-Stroke engine, GX35
- Ergonomically designed easy-grip bull handle
- Safety goggles & full operator harness included

IDEAL FOR
Contractors

TILLER

FRC801K1

Superior engineering means Honda Tillers are powerful and economical with low noise.

- 3 Forward speeds and 1 reverse
- Honda GX240 4-stroke engine
- 20" (507mm) Tine width
- Dry weight 120kg
- 20" Tine diameter
- Self propelled

IDEAL FOR
Contractors

LAWNMOWERS

HRR216

Further cementing Honda's reputation as one of the premier manufacturers of domestic lawnmowers.

- 4-Stroke GCV160 engine
- 21" cutting deck
- 67-litre catcher bag
- Micro cut twin blade system for finer clippings

HRU216M3

With 21" cutting deck, it will get round large lawns faster.

- Self-propelled operating with a 3-speed gear box
- 4-Stroke commercial GXV160 engine
- 70 litre Dacron grass catcher
- 21" cutting deck

IDEAL FOR
Contractors

NEW ZEALAND DEALER NETWORK

We are New Zealand owned and operated, providing Genuine Honda products to customers for over 40 years. Honda Power Equipment is supported by a dealer network of nationwide stockists of parts and wholesalers, and in addition, supply and support customers such as NZ Government Departments, Civil Defence and NZ Emergency Services. We work hard to support local communities and have built key partnerships in the government, rural and infrastructure sector.

To find your nearest dealer visit www.hondapowerequipment.co.nz

SIGN UP TO THE NEWSLETTER

Stay in touch and up-to-date with Honda Power Equipment New Zealand.

Each month, and no more than once a month, we send out product news & information to an extensive database of Honda Power Equipment fans. Head along to www.hondapowerequipment.co.nz/newsletter-signup and enter your email address so you don't miss out on the latest developments at Honda Power Equipment.
