

# Super Cups

For High-Heat Applications

THE STANDARD  
IN TIG WELDING

The right nozzle for the toughest TIG welding applications is the CK Worldwide Super Cup. Super Cups withstand high-amperage and high-reflective heat applications while minimizing cracking problems related to thermal shock.

- Lasts longer in high heat applications than alumina cups
- Reduces downtime
- Reduces replacement parts costs
- Reduces effects of nozzle erosion
- Reduces thermal conductivity by approximately 40%
