### Non-Charged, Clipped Corner RAN 201-45

The Rankin Basics non-charged clipped corner slides work excellent in all slide printers. If you are using the Leica ink jet slide printer, the RAN 201-45-IKJ are ideal.

### Non-Charged, 90° Corner RAN 201-90

The Rankin Basics non-charged 90 degree corner slides will work excellent in all slide printers, but we do recommend the clipped corner slides if you are using a slide printer. If you are using the Leica ink jet slide printer, the RAN 201-90-IKJ are ideal.

### Non-Charged, for Leica Ink Jet Printer RAN 201-45-IKJ

The Rankin Basics non-charged ink jet printer slides have clipped corners and painted ends that are optimized to perform best on the Leica ink jet printer.

## NON-CHARGED SLIDES

The Rankin Basics non-charged microscope slides are  $\frac{3}{4}$  white  $\frac{1}{4}$  green glass composition, excellent for general histology use. The perfectly flat painted ends make for crisp labeling of text and barcodes.

### Charged, Clipped Corner RAN 202-45

The Rankin Basics charged clipped corner slides work excellent in all slide printers. If you are using the Leica ink jet slide printer, the RAN 202-45-PC are ideal.

### Charged, 90° Corner RAN 202-90

The Rankin Basics charged 90 degree corner slides will work excellent in all slide printers, but we do recommend the clipped corner slides if you are using a slide printer. If you are using the Leica ink jet slide printer, the RAN 202-90-PC are ideal.

### Charged, for Leica Ink Jet Printer RAN 202-45-PC

The Rankin Basics charged ink jet printer slides have clipped corners and painted ends that are optimized to perform best on the Leica ink jet printer.

# CHARGED SLIDES

The Rankin Basics charged microscope slides are  $\frac{3}{4}$  white  $\frac{1}{4}$  green glass composition, excellent for general histology use. The charged coating is guaranteed to not lose tissue, and is guaranteed not to stick to each other. The perfectly flat painted ends make for crisp labeling of text and barcodes.

### Electrostatically Charged, Extra Adhesion, Pure White for IHC RAN 203

The perfectly flat painted ends make for crisp labeling of text and barcodes, and will work in most slide printers. The Rankin Basics IHC slides only come in 90 degree corners.

# IHC SLIDES ELECTROSTATICALLY CHARGED

The Rankin Basics IHC microscope slides are a pure white, ultra-clear, hydrophilic glass composition guaranteed to not autofluorescence and built to withstand extreme staining environments. The strong electrostatically charged surface is ideal for use on the Ventana staining system, as well as most other autostainers. Tissue is guaranteed to stay on.

ITEM CODE	COLOR	CASE SIZE
RAN 203-W	White	1,440
RAN 203-B	Light Blue	1,440
RAN 203-Y	Yellow	1,440
