

LAN STATION RACKING SYSTEM

The LAN Station Racking System easily installs under the work surface of a Performance Series® 200 or 300 LAN Station/Workbench. These two series of workbenches have two lower shelves that help hold the Racking System in place. With the Racking System you can easily install rackmount components next to tower servers and computers. When the racking system is installed, you can turn any work station into a fully functional open frame rack. Built with a 24" depth and cage nut style rails, this racking system has the capacity to hold up to 400 lbs. of your equipment.

- 13U
- Installs in minutes
- 24" fixed mounting depth
- 400 lb. weight capacity
- Made in the USA
- Limited Lifetime Warranty

FEATURES

Compatible LAN Stations - The LAN Station Racking System is ideal for the Performance Series® 200 or 300 LAN Station/Workbench. With the two lower shelves on these LAN stations, the Racking System is well supported and will maintain its 400 lb. weight capacity.
