

WALL MOUNT SFF CPU BRACKET

Kendall Howard's Small-Form-Factor (SFF) Wall Mount CPU Brackets are designed to get the computer off the floor or desktop. Computers located on the floor are in continual danger of being jostled and kicked, and also create difficulty when accessing drives, ports, and card readers. But the desk is not always the best spot for this equipment either. Desktop computers and PCs located on desks take up valuable workspace, create a cluttered and unorganized look, and run the risk of being damaged by coffee or soda spills. The Wall Mount SFF CPU Brackets are an easy mounting solution to protect your PC and ultimately get it off the floor or desktop. To help secure the PC, a Velcro strap is included with the bracket.

- Heavy duty 14 gauge steel
- Maximum dimensions: 4.25" W x 18" D
- Velcro strap included
- Mounts in minutes
- Made in the USA
- Limited Lifetime Warranty

FEATURES

Universal Design - The heavy duty welded design provides a dependable mounting solution for most CPUs and PCs.

Included Velcro Strap - The SFF Wall Mount CPU Bracket includes a large Velcro strap that can be fed through slots on the side of the bracket for added support.

Easy to Install - The bracket ships fully assembled for your convenience. To install, simply secure hardware through the 16" on center mounting holes and the bracket is ready for use.
