Dear Skinny & Co. Customers and Retailers

I hope that this finds you and your families well during the current health crisis. I wanted to inform you of our situation and steps we're taking during the Corona Virus Pandemic.

We have taken all the precautionary steps recommended by the CDC and WHO to ensure that our associates are safe. This includes social distancing, continuous hand washing and disinfecting. Since our products are manufactured in our FDA food grade production room, our production environment is sterile and our associates continue to wear the appropriate work gear to maintain the same clean environment we always have had to ensure you always get the purest products from us.

Fortunately, none of our associates or vendor partners that come to our headquarters facility have been affected. In order for us to continue to maintain a virus free environment and out of an abundance of caution, we have instructed our associates to stay home if they feel even the slightest form of discomfort. Our front office staff has been given the liberty to work from home so they can adhere to social distancing and be with their families many of whom have been impacted by school closures.

To our customers and retailers, I would like to point out that Skinny Coconut Oil is a very high quality patented oil that is extremely rich in Lauric Acid, which is a great immune boost. Since everyone has been washing their hands so much, consider and/or recommend Tasalli Body Butters or Skinny Body Melts. Just like your skin's natural sebum, our melts and butters anti microbial properties protect the skin while nourishing and deeply moisturizing. We should not panic but rather be smart about our choices and make sure we do everything possible to boost our immune system with anti microbial 100% natural products.

On behalf of The Skinny & Co. Family, I hope that you and your loved ones stay safe & healthy.

Sincerely,

Jaime A. Vasquez
CEO
