

CUSTOM CARBON SURFBOARD GUIDE

# THE SHAPING OF DARK ARTS

Dark Arts carbon technology is a buzzing channel within the surf industry that collaborates with prominent surfboard shapers from around the world. Inspired by innovation and quality, we've rethought the process of crafting surfboards. As a result, we offer the lightest, strongest, best performing models on the market.

Dark Arts began in 2019, founded by veteran board builder and surfing purist, Justin Ternes. After a twenty-one year quest, Justin answers the question, "What is the perfect surfboard, and how is it made?" Dark Arts creates unrivaled carbon boards, led by the conviction that surfboards should preserve and enhance the essence of surfing.

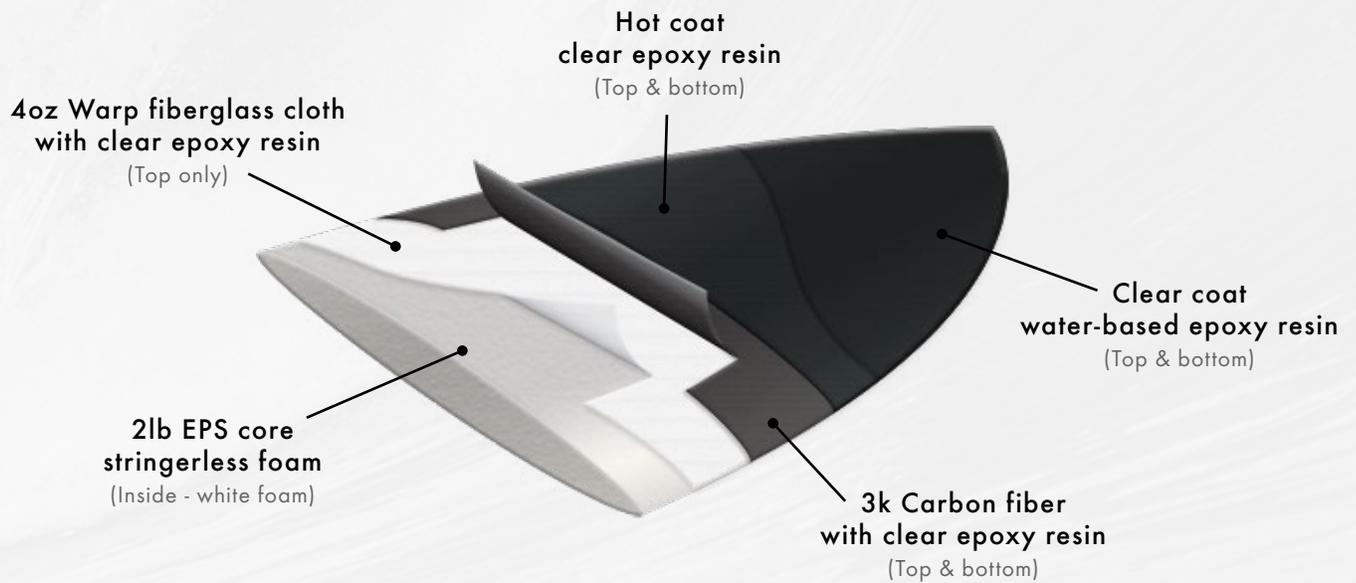

Assembled in our hometown of San Diego, these American-made products are shaped by world-class shapers then glassed with a refined carbon-fiber vacuum bagging technique, utilizing best environmental practices.

# WHAT WE'RE MADE OF

Adding carbon fiber cloth to a performance surfboard design, truly unites speed and agility with improved durability.

Our surfboards represent American craftsmanship, sustainable values, visionary shaping, and surfing expertise to offer a high performance carbon surfboard.

# CHOOSING YOUR DARK ARTS

Our carbon technology paired with these legendary shapers will help you find the perfect surfboard for your next session.

## HIGH PERFORMANCE:

Hunting barrels, working on your air game, or generating speed for that end section gouge.

## GROVELER:

Your go-to smaller wave board. More forward volume for speed through flat sections.

# PERSONALIZATION

We think an all black board is perfection but you may want to modify your ride with a pigment deck.

\*Pigment is deck only - wrapped around rails. Bottom is black carbon.

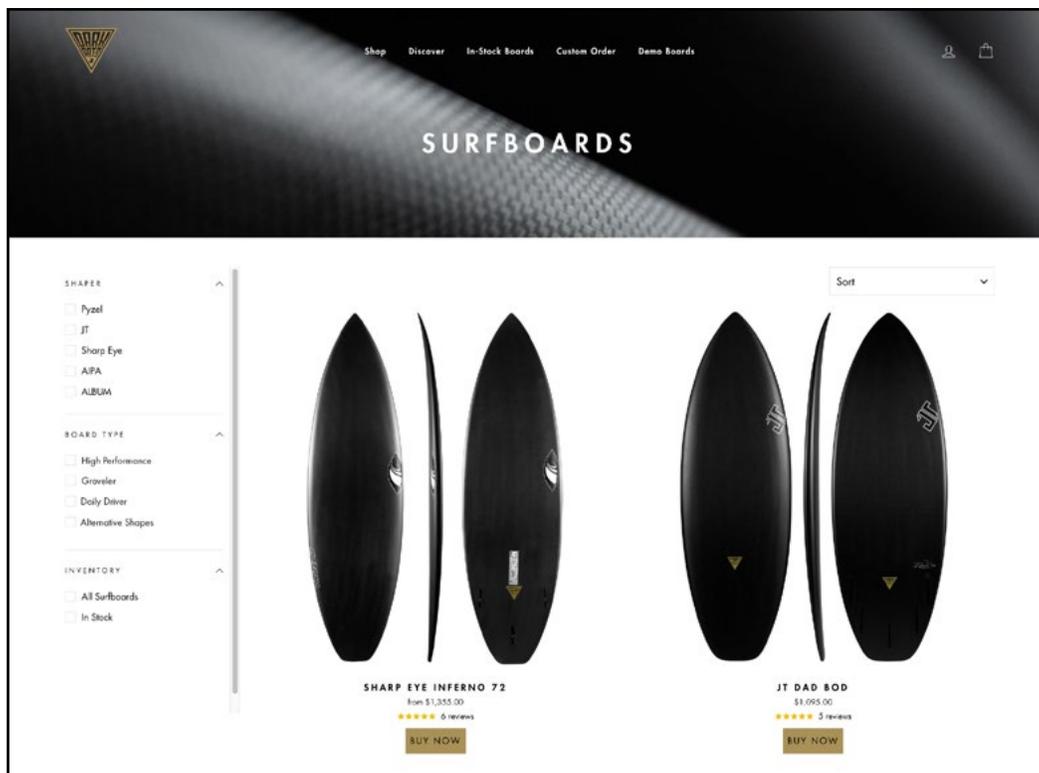

# EASILY FIND YOUR PERFECT BOARD

Once you're at DarkArtsSurf.com you can click "SURFBOARDS" and filter by board type and shaper, if you have a favorite.

SEE FOR YOURSELF
